Information for your safety and comfort

Read these instructions carefully. Keep this document for future reference. Follow all warnings and instructions marked on the product.

Turning the product off before cleaning

Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.

Caution for plug as disconnecting device

Observe the following guidelines when connecting and disconnecting power to the external power supply unit:

- Install the power supply unit before connecting the power cord to the AC power outlet.
- Unplug the power cord before removing the power supply unit from the projector.
- If the system has multiple sources of power, disconnect power from the system by unplugging all power cords from the power supplies.

Caution for Accessibility

Be sure that the power outlet you plug the power cord into is easily accessible and located as close to the equipment operator as possible. When you need to disconnect power to the equipment, be sure to unplug the power cord from the electrical outlet.

- Do not use this product near water.
- Do not place this product on an unstable cart, stand or table. If the product falls, it could be seriously damaged.
- Slots and openings are provided for ventilation to ensure reliable operation of the product and to protect it from overheating. These openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug or other similar surface.
- This product should never be placed near or over a radiator or heat register, or in a built-in installation unless proper ventilation is provided.
- Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind onto or into the product.
- To avoid damage of internal components and to prevent battery leakage, do not place the product on a vibrating surface.

 Never use it under sporting, exercising, or any vibrating environment which will probably cause unexpected short current or damage rotor devices, lamp.

Using electrical power

- This product should be operated from the type of power indicated on the marking label. If you are not sure of the type of power available, consult your dealer or local power company.
- Do not allow anything to rest on the power cord. Do not locate this
 product where people will walk on the cord.
- If an extension cord is used with this product, make sure that the total
 ampere rating of the equipment plugged into the extension cord does not
 exceed the extension cord ampere rating. Also, make sure that the total
 rating of all products plugged into the wall outlet does not exceed the fuse
 rating.
- Do not overload a power outlet, strip or receptacle by plugging in too many devices. The overall system load must not exceed 80% of the branch circuit rating. If power strips are used, the load should not exceed 80% of the power strip's input rating.
- This product's AC adapter is equipped with a three-wire grounded plug.
 The plug only fits in a grounded power outlet. Make sure the power outlet
 is properly grounded before inserting the AC adapter plug. Do not insert
 the plug into a non-grounded power outlet. Contact your electrician for
 details.

Warning! The grounding pin is a safety feature. Using a power outlet that is not properly grounded may result in electric shock and/or injury.

Note: The grounding pin also provides good protection from unexpected noise produced by other nearby electrical devices that may interfere with the performance of this product.

Use the product only with the supplied power supply cord set. If you need
to replace the power cord set, make sure that the new power cord meets
the following requirements: detachable type, UL listed/CSA certified, VDE
approved or its equivalent, 4.5 meters (15 feet) maximum length.

Product servicing

Do not attempt to service this product yourself, as opening or removing covers may expose you to dangerous voltage points or other risks. Refer all servicing to qualified service personnel.

Unplug this product from the wall outlet and refer servicing to qualified service personnel when:

- the power cord or plug is damaged, cut or frayed
- liquid was spilled into the product
- the product was exposed to rain or water
- the product has been dropped or the case has been damaged
- the product exhibits a distinct change in performance, indicating a need for service
- the product does not operate normally after following the operating instructions

Note: Adjust only those controls that are covered by the operating instructions, since improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal condition.

Warning! For safety reasons, do not use non-compliant parts when adding or changing components. Consult your reseller for purchase options.

Your device and its enhancements may contain small parts. Keep them out of the reach of small children.

Additional safety information

- Do not look into the projector's lens when the lamp is on. The bright may hurt your eyes.
- Turn on the projector first and then signal sources
- Do not place the product in following environments:
 - Space that is poorly ventilated or confined. At least 50cm clearance from walls and free flow of air around the projector is necessary.
 - Locations where temperatures may become excessively high, such as inside of a car with all windows rolled up.
 - Locations where excessive humidity, dust, or cigarette smoke may contaminate
 optical components, shortening the life span and darkening the image.
 - · Locations near fire alarms.
 - Locations with an ambient temperature above 40 °C/104 °F.
 - Locations where the altitudes are higher than 10000 feet.
- Unplug immediately if there is something wrong with your projector. Do
 not operate if smoke, strange noise or odor comes out of your projector. It
 might cause fire or electric shock. In this case, unplug immediately and

- contact your dealer.
- Do not keep using this product to break or drop it. In this case contact your dealer for inspection.
- Do not face the projector lens to the sun. It can lead to fire.
- When switching the projector off, suggest to ensure the projector completes its cooling cycle before disconnecting power.
- Do not frequently turn off the main power abruptly or unplug the projector during operation. The best way is to wait for the fan to turn off before turning main power off.
- Do not touch air outlet grille and bottom plate which becomes hot.
- Do not look into the air outlet grille when projector is operating. It may hurt your eyes.
- Always open the lens shutter or remove the lens cap when the projector is
 on.
- Do not block the projector lens with any object when the projector is under operation as this could cause the object to become heated and deformed or even cause a fire. To temporarily turn off the lamp, press HIDE on the remote control.
- The lamp becomes extremely hot during operation. Allow the projector to cool for approximately 45 minutes prior to removing the lamp assembly for replacement.
- Do not operate lamps beyond the rated lamp life. It could cause it to break on rare occasions.
- Never replace the lamp assembly or any electronic components unless the projector is unplugged.
- The product will detect the life of the lamp itself. Please be sure to change the lamp when is showing warning message.
- When changing the lamp, please allow unit to cool down, and follow all changing instructions.
- Reset the "Lamp Hour Reset" function from the Onscreen display
 "Management" menu after replacing the lamp module.
- Do not attempt to disassemble this projector. There are dangerous high voltages inside which may hurt you. The only user serviceable part is the lamp which has its own removable cover. Refer servicing only to suitable qualified professional service personnel.
- Do not stand the projector on end vertically. It may cause the projector to fall over, causing injury or damage.
- This product is capable of displaying inverted images for ceiling mount installation. Only use acer ceiling mount kit for mounting the projector and ensure it is securely installed.

Caution for Listening

To protect your hearing, follow these instructions.

- Increase the volume gradually until you can hear clearly and comfortably.
- Do not increase the volume level after your ears have adjusted.
- Do not listen to music at high volumes for extended periods.
- Do not increase the volume to block out noisy surroundings.
- Decrease the volume if you can't hear people speaking near you.

Disposal instructions

Do not throw this electronic device into the trash when discarding. To minimize pollution and ensure utmost protection of the global environment, please recycle. For more information on the Waste from Electrical and Electronics Equipment (WEEE) regulations, visit

http://www.acer-group.com/public/Sustainability/sustainability01.htm

Mercury advisory

For projectors or electronic products containing an LCD/CRT monitor or display:

Lamp(s) inside this product contain mercury and must be recycled or disposed of according to local, state or federal laws. For more information, contact the Electronic Industries Alliance at www.eiae.org. For lamp-specific disposal information, check www.lamprecycle.org

Do not stare into the beam, RG2

"As with any bright source, do not stare into the direct beam, RG2 IEC 62471-5:2015"

First things first

Usage Notes

Do:

- Turn off the product before cleaning.
- Use a soft cloth moistened with mild detergent to clean the display housing.
- Disconnect the power plug from AC outlet if the product is not being used for a long period of time.

Don't:

- Block the slots and openings on the unit provided for ventilation.
- Use abrasive cleaners, waxes or solvents to clean the unit.
- Use under the following conditions:
 - In extremely hot, cold or humid environments.
 - In areas susceptible to excessive dust and dirt.
 - Near any appliance that generates a strong magnetic field.
 - Place In direct sunlight.

Precautions

Follow all warnings, precautions and maintenance as recommended in this user's guide to maximize the life of your unit.

Warning:

- Do not look into the projector's lens when the lamp is on. The bright light may hurt your eyes.
- To reduce the risk of fire or electric shock, do not expose this product to rain or moisture.
- Please do not open or disassemble the product as this may cause electric shock.
- When changing the lamp, please allow unit to cool down, and follow all changing instructions.
- This product will detect the life of the lamp itself. Please be sure to change the lamp when it shows warning messages.
- Reset the "Lamp Hour Reset" function from the Onscreen display "Management" menu after replacing the lamp module.
- When switching the projector off, please ensure the projector completes its cooling cycle before disconnecting power.
- Turn on the projector first and then the signal sources.
- Do not use lens cap when projector is in operation.
- When the lamp reaches the end of its life, it will burn out and may make a loud
 popping sound. If this happens, the projector will not turn back on until the lamp
 module has been replaced. To replace the lamp, follow the procedures listed under
 "Replacing the Lamp".

Introduction

Product Features

This product is a single-chip DLP® projector. Outstanding features include:

- DLP[®] technology
- Native 3840x2160 resolution Full/4:3/16:9/L.Box/Anamorphic 2.35:1 aspect ratio supported
- High brightness and contrast ratio
- Versatile display modes (Bright, Standard, sRGB*, Rec. 709*, Movie, Dark Cinema, Game, Sports, Silent, ISF Night*, ISF Day*, User) enable optimum performance in any situation
- HDTV (480i/p, 576i/p, 720p, 1080i/p, 2160p) supported
- Lower power consumption and economy (ECO) mode extend lamp life
- Acer EcoProjeciton Technology delivers Intelligent power management approach and physical efficiency improvement
- Equipped with HDMI™ & MHL connection supporting HDCP
- Smart detection delivers guick, intelligent source detection
- Multi-language onscreen display (OSD) menus
- Manual focus projection lens zooms up to 1.6x
- 1.25x digital zoom
- Microsoft[®] Windows[®] 2000, XP, Vista[®], Windows 7, Windows 8.1,
 Windows 10, Macintosh[®] OS compliant, ChromeOS Compliant
- Support MHL V2.1 signal display
- Auto image re-sizing to 4K Addressable Pixels full screen
- Built-in Two 5 Watts speakers
- Manual lens vertical shift adjustment

Note: (*) Functions vary depending on model definition.

Package Overview

This projector comes with all the items shown below. Check to make sure your unit is complete. Contact your dealer immediately if any thing is missing.

Projector

Power cord

HDMI cable

User's guide (option)

Quick start guide

Carrying case

(option)

Remote control

AAA battery x2 (option)

WirelessCAST (option)

WirelessHD-Kit (option)

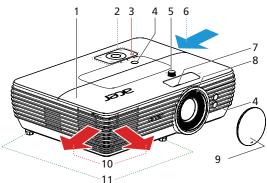

Note: When projecting a 4K2K/60Hz signal, use an HDMI Premium certified 4K2K/60Hz cable supporting 18Gbps bandwidth.

10	d D	KEYSTONE	No function.
11	BACK	ВАСК	Returns to the previous operation.
12	VGA	VGA	Press "VGA" to change source to the VGA connector. This connector supports analog RGB, YPbPr (480p/576p/720p/1080i), YCbCr (480i/576i) and RGB sync.
13	INFO	Information	Display the projector information for Model Name, Input Source, Signal Type, Display Mode, Software Version and QR Code on the screen.
14	BRIGHT	Brightness	Adjust the brightness of the image.
15	GAMMA	GAMMA	Effects the representation of dark scenery. With greater gamma value, dark scenery looks brighter.
16	CONT.	Contrast	Adjusting the contrast changes the amount of black and white in the image.
17	RATIO	Aspect Ratio	To choose the desired aspect ratio.
18	MENU	MENU	Press "MENU" to launch the Onscreen display (OSD) menu or exit the OSD menu.
19	HDMI/ MHL	HDMI™/MHL	To change source to HDMI/MHL.
20	FREEZE	FREEZE	To pause the screen image.
21	HIDE	HIDE	Momentarily turns off the video. Press "HIDE" to hide the image, press again to display the image.
22	SHARP	Sharpness	Adjusts the sharpness of the image.
23	30	3D	No function.
24	SUPER RES.	Super Resolution	Adjust the edges of the projected image in order to provide more perceived details.

Note: Functions vary depending on model definition.

MHL (Mobile High-Definition Link) Control

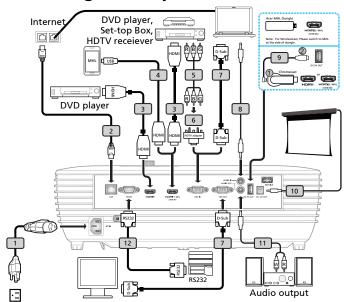

#	lcon	Function	Description	
1	MODE	MODE	 Press "MODE" button for one second to activate the MHL Control Mode. 	
			To exit, press the "MODE" button again.	
2	ENTER	Select/Enter	Press to select/enter the file.	
3		Four directional select keys	Use up, down, left, right buttons to select items or make adjustments to your selection.	
4	BACK	Back/Exit	 Press "BACK" to go back one menu step. To exit the file. 	
5	MENU	MENU	Press to launch the root memu.	

Note: Functions vary depending on model definition.

Getting Started

Connecting the Projector

#	Description	#	Description
1	Power cord	7	VGA cable
2	LAN cable	8	Audio cable Jack/Jack
3	HDMI cable	9	USB cable for charging device
4	MHL cable (MicroUSB to HDMI)	10	12V DC cable
5	3 RCA component cable	11	Audio cable Jack/RCA
6	VGA to component/HDTV adapter	12	RS232 cable

Note 1: To ensure the projector works well with your computer, please make sure the timing of the display mode is compatible with the projector.

Note 2: Functions vary depending on model definition.

Note 3: USB cable needs powered extender if the length is over 5 m.

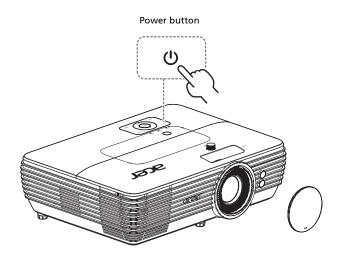

Note 4: Some smartphones require a converter (supplied by smartphone maker) to enable the MHL function.

Note 5: USB DC 5V out connector support 5V/1.5A power output for HDMI dongle charging only when MHL source is not detected. **Note 6:** DC 12V out connector support 12V/100mA power for screen control only.

Turning the Projector On/Off

Turning on the Projector

- 1 Ensure that the power cord and signal cable are securely connected. The Power indicator LED will flash red.
- Turn on the projector by pressing "Power" button on the control panel or remote control, and the Power indicator LED will turn blue.
- 3 Turn on your source (computer, notebook, video player ,etc.). The projector will detect your source automatically.
 - If the screen displays "Lock" and "Source" icons, it means the
 projector is locked onto a specific source type and there is no such
 type of input signal detected.
 - If the screen displays "No Signal", please make sure the signal cables are securely connected or press source direct key.
 - If you connect to multiple sources at the same time, use the "Source" button on either control panel or the remote control or direct source key on the remote control to switch between inputs.

Turning the projector off

- 1 To turn the projector off, press and hold the power button. This message appears: "Please press the power button again to complete the shutdown process." Press the power button again.
- 2 The LED power indicator will turn RED and blink rapidly after the projector is turned off, and the fan(s) will continue to operate for about 10 seconds to ensure that the system cools properly.
- 3 Once the system has finished cooling, the LED power indicator will stop blinking and turn solid red to indicate standby mode.
- 4 It is now safe to unplug the power cord.

- "Projector Overheated. Lamp will automatically turn off soon."
 This onscreen message indicates that the projector has overheated.
 The lamp with automatically turn off, the projector will automatically shut down, and the LED temp indicator will turn solid red. Contact your local dealer or service center.
- "Fan failed. Lamp will automatically turn off soon."
 This onscreen message indicates that the fan has failed. The lamp will automatically turn off, the projector will automatically shut down, and the LED temp indicator will blink. Contact your local dealer or service center.

Note 1: Whenever the projector automatically shuts down and the LED lamp indicator turns solid red, contact your local reseller or service center.

Note 2: Functions vary depending on model definition. **Attention!** The projector will enter a two minute cool down period to ensure continued optimal lamp operation. **Attention!** Please do not turn off projector within 1 minute after power on.

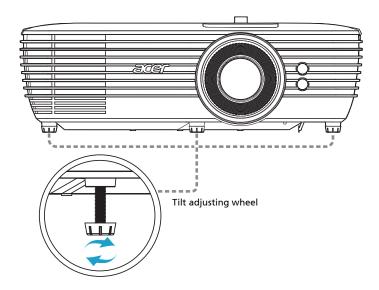

Adjusting the Projected Image

Adjusting the Height of Projected Image

The projector is equipped with elevator feet for adjusting the height of image.

To raise/lower the image:

Use Tilt adjusting wheel to fine-tune the display angle.

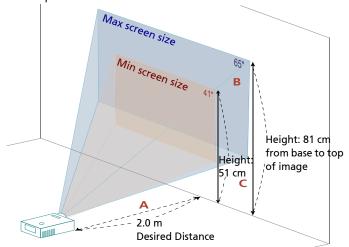

How to optimize image size and distance

Consult the table below to find the optimal image sizes achievable when the projector is positioned at a desired distance from the screen. If the projector is 2.0 m from the screen, good image quality is possible for image sizes between 41" and 65".

Note: Remind as below figure, the space of 81 cm height is required when located at 2 m distance.

	Screen size		Тор	Screen size		Тор	
Desired Distance	(Min zoom)		m)	(Max zoom)			
(m) <a>	Diagonal (inch) 	W (cm) x H (cm)	From base to top of image (cm) <c></c>	Diagonal (inch) 	W (cm) x H (cm)	From base to top of image (cm) <c></c>	
1.0	20.00	45 x 25	25	33	72 x 40	40	
1.3	26	59 x 33	33	42	94 x 53	53	
2.0	41	90 x 51	51	65	144 x 81	81	
2.5	51	113 x 63	63	81	181 x 101	101	
3.0	61	135 x 76	76	97	216 x 121	121	
3.5	71	158 x 89	89	114	252 x 142	142	
4.0	81	180 x 101	101	130	288 x 162	162	
5.0	102	225 x 127	127	162	360 x 202	202	
6.0	122	270 x 152	152	195	432 x 243	243	
7.0	142	315 x 177	177	227	504 x 283	283	
8.0	163	360 x 203	203	260	576 x 324	324	
9.0	183	405 x 228	228	292	647 x 364	364	
9.3	189	419 x 236	236	302	669 x 376	376	

Zoom Ratio: 1.6x

How to get a preferred image size by adjusting distance and zoom

The table below shows how to achieve a desired image size by adjusting either the position or the zoom ring.

To obtain an image size of 60" set the projector at a distance 1.8 m and 2.9 m from the screen.

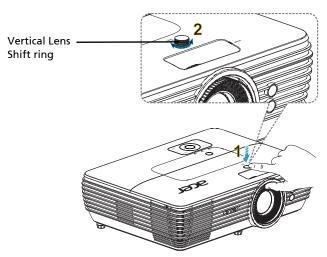

Desired Image Size		Distan	ce (m)	Top (cm)	
Diagonal (inch) <a>	W (cm) x H (cm)	Max zoom 	Min zoom <c></c>	From base to top of image <d></d>	
20	44 x 25		1.0	25	
26.45	59 x 33	0.8	1.3	33	
60	133 x 75	1.8	2.9	75	
70	155 x 87	2.2	3.4	87	
80	177 x 100	2.5	3.9	100	
90	199 x 112	2.8	4.4	112	
100	221 x 125	3.1	4.9	125	
120	266 x 149	3.7	5.9	149	
150	332 x 187	4.6	7.4	187	
200	443 x 249	6.2	9.8	249	
250	553 x 311	7.7	12.3	311	
300	664 x 374	9.2	14.7	374	
303.2	671 x 378	9.3		378	

Zoom Ratio: 1.6x

How to get a preferred image position by adjusting lens shift

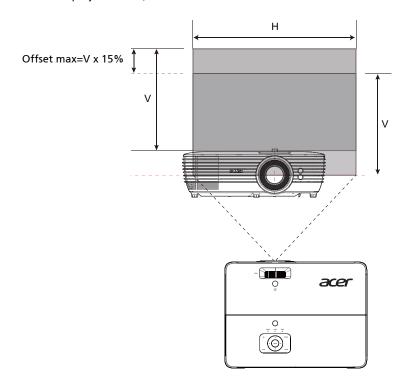

The projector is equipped with lens shift for adjusting the position of projected image up and down without requiring you to physically move the projector.

Note: The figures shown in this section are for reference only not approximate value. The figures between units can be different due to assembly tolerance.

The vertical height can be adjusted between 0% and 15% of the image height. (The typical vertical image offset is fixed at 15% of the image height above the center of the projector lens.)

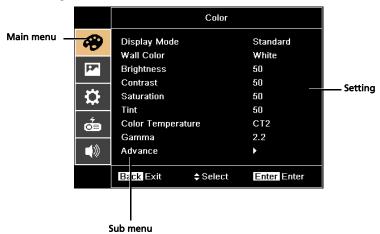

User Controls

Onscreen Display (OSD) Menus

The projector has multilingual OSD that allow you to make image adjustments and change a variety of settings.

Using the OSD menus

- To open the OSD menu, press "MENU" on the remote control or control panel.
- When the OSD is displayed, use the week keys to select any item in the main menu. After selecting the desired main menu item, press "ENTER" to enter submenu for feature setting.
- Use the **(A)** keys to select the desired item and adjust the settings by using the **(4)** keys.
- Select the next item to be adjusted in the submenu and adjust as described above.
- Press "BACK" on the remote control or control panel, the screen will return to the main menu.
- To exit OSD, press "BACK" on the remote control or control panel. The OSD menu will close and the projector will automatically save the new settings.

(3)

Note 1: Some of the following OSD settings may not be available. Please refer to the actual OSD of your projector.

Note 2: Functions vary depending on model definition.

http://www.pureglare.com.au

Color

	T			
Display Mode	There are many factory presets optimized for various types of images.			
	Bright: For brightness optimization.			
	Standard: For common environment.			
	sRGB: standard RGB color space.			
	Movie: For brighter and general movie/video/photo playing.			
	Dark Cinema: For dark movie content.			
	Game: For game content.			
	Sports: For sport picture.			
	Silent: For silent environment.			
	Rec. 709: standard Rec. 709 color space.			
	ISF Day: Calibrate and optimize the projection image based on bright environment by an ISF Certified technician.			
	ISF Night: Calibrate and optimize the projection image based on dark environment by an ISF Certified technician.			
	User: Memorize user's settings.			
Wall color	Use this function to choose a proper color according to the wall. There are several choices, including white, light yellow, light blue, pink, dark green. It will compensate the color deviation due to the wall color to show the correct image tone.			
Brightness	Adjust the brightness of the image.			
	Press to darken the image.			
	Press to lighten the image.			
Contrast	"Contrast" controls the difference between the lightest and darkest parts of the picture. Adjusting the contrast changes the amount of black and white in the image.			
	Press to decrease the contrast.			
	Press to increase the contrast.			
Saturation	Adjusts a video image from black and white to fully saturated color.			
	• Press (to decrease the amount of color in the image.			
	Press to increase the amount of color in the image.			
Tint	Adjusts the color balance of red and green.			
	Press (to increase the amount of green in the image.			
	Press to increase the amount of red in the image.			
Color	Use this function to choose CT1, CT2, CT3.			
Temperature				
Gamma	Effects the representation of dark scenery. With greater gamma value, dark scenery looks brighter.			

Advanced

RGR Gain/Rias

Adjusts the red gain/green gain/blue gain/red bias/green bias/blue bias for color optimization.

AcuEngine: Adjust the AcuEngine parameters.

- AcuColor: Use to significantly increase the image's vividness.
- AcuMotion: Activate AcuMotion to provide a smoother image when viewing video content.
- AcuMotion Demo: This feature enables you to see the difference in the image quality between the raw unprocessed image and the image processed as processed by the AcuMotion. Use this mode to check the adjustments that you make to the AcuMotion settings.

Dvnamic Black

Choose "On" to automatically optimize the display of dark movie scenes enabling them to be shown in incredible detail.

HDR

Compatible with the latest HDR format, which delivers crisp, clear images with sharp changes in brightness, and provides realistic images with enhanced details, extended depth of field, and rich color gamut. HDR has 4 levels and each level suits different type of content, including derivative and bright scene.

<Note> If the HDR option is adjusted under the SDR (Standard Dynamic Range) signal, the screen is an abnormal color.

ISF

- The certified ISF technician will calibrate and optimize the projection image according to your actual environment. The ISF input password will be kept by technician only.
- 2. "ISF Day" and "ISF Night" will not be shown in display mode if projector equipped with ISF function has not been calibrated by an ISF certified technician. For more information, please go to ISF official website: https://www.imagingscience.com and contact the dealer located in your country.
- The ISF calibration will be charged and guaranteed by ISF certified calibrator, and thereby Acer is not responsible for the calibration service.

Note 1: "Saturation" and "Tint" functions are not supported under computer or HDMI mode.

Note 2: Functions vary depending on model definition.

Image

Draiaction				
Projection				
	• Front: The factory default setting.			
	• Rear: When you select this function, the projector reverses the image so you can project from behind a translucent screen.			
	Rear Ceiling: When you select this function, the projector reverses and inverts the image at same time. You can project from behind a translucent screen with ceiling mounted projection.			
	Ceiling: When you select this function, the projector inverts the image for ceiling-mounted projection.			
Aspect Ratio	Use this function to choose your desired aspect ratio.			
	 Auto: Keep the image with original width-higth ratio and maxi mize the image to fit native horizontal or vertical pixels. 			
	Full: Resize image to fit full screen by width (3840 pixels) and height (2160 pixels).			
	4:3: The image will be scaled to fit the screen and displayed using a 4:3 ratio.			
	16:9: The image will be scaled to fit the width of the screen and the height adjusted to display the image using a 16:9 ratio.			
	 L.Box: Keep original signal aspect ratio and zoom in by 1.333 times. 			
	Anamorphic 2.35:1: Stretches the image vertically to fit anamorphic lens. Keeps the image with original width ratio and resizes the its height to 1.321875 ties of the orginal image.			
Sharpness	Adjusts the sharpness of the image.			
	 Press (◀) to decrease the sharpness. 			
	Press to increase the sharpness.			
Super Resolution	Adjust the edges of the projected image in order to provide more perceived details.			
Signal	H. Position (Horizontal position)			
	Press to move the image left.			
	Press to to move the image right.			
	V. Position (Vertical position)			
	• Press 🜒 to move the image left.			
	• Press 🕟 to to move the image right.			
	Frequency "Frequency" changes the projector's refresh rate to match the frequency of your computer's graphics card. If you can see a vertical flickering bar in the projected image, use this function to make the necessary adjustments.			
	Tracking Synchronizes the signal timing of the projector with the graphics card. If you experience an unstable or flickering image, use this function to correct it.			

HDMI	HDMI Color Range
	Adjust the color range of the HDMI image data to correct color display
	error.
	 Auto: Automatically adjust by information from player.
	Limited Range: Prosess the input image as limited color range data.
	Full Range: Prosess the input image as full color range data.
	HDMI Scan Info
	Adjust the overscan ratio of the HDMI image on screen.
	 Auto: Automatically adjust by information from player.
	 Underscan: Always no overscan on HDMI image.
	Overscan: Always keep overscan on HDMI image.

Note 1: "H. Position", "V. Position", "Frequency" and "Tracking" functions are not supported under HDMI or Video mode.

Note 2: "HDMI Color Range" and "HDMI Scan Info" functions are only

supported under HDMI mode.

Note 3: Functions vary depending on model definition.

Setting

Source Selection	Manual by source menu, Auto by Smart Detection.			
Auto Screen	Default is "On", the down/up move of electronic screen will be related with power on/off of Projector.			
DC 5V Out	Default is "On". Choose "Off" to Disable DC 5V OUT connection. <note> 5V/1.5A power output if MHL source is not detected. Warning!The DC 5V Out may happen power conflict if connecting to PC and result in electric shock and/or injury.</note>			
VGA OUT (Standby)	Default is "Off". Choose "On" to enable VGA OUT connection.			
Test Pattern	Default is "Off" to disable this function. Choose "On" to enable test pattern for installation.			
LAN	LAN Standby Default is "Off". Choose "On" to enable LAN control under standby mode.			
	LAN IP Identify IP address.			
	LAN Mask Identify Mask address.

Information	Display the projector information for Model Name, Input Source, Signal Type, Display Mode, Software Version and QR code on the screen.			
	Scan QR code linking to Acer projector portal via mobile.			
Reset	Press the "ENTER" button and choose "Yes" to return the parameters on all menus to the factory default settings.			

Note: Functions vary depending on model definition.

Management

ECO Mode	Choose "On" to dim the projector lamp which will lower power consumption, extend the lamp life and reduce noise. Choose "Off to return normal mode.	
High Altitude	Choose "On" to turn on High Altitude mode. Operate the fans at full speed continuously to allow for proper high altitude cooling o the projector.	
Auto Shutdown	The projector will automatically shutdown when there is no signal input after the allocated time. (default is 15 minutes)	
Menu Display Time (Seconds)	Choose the OSD menu display time. (Default is 15 seconds). Select "Manual" to turn off main menu/one direct-key menu manually buser.	
AC Power On	Choose "On" to power on projector while AC power plug in.	
Lamp	Lamp Hour Elapse Displays the lamp's elapsed operating time (in hours).	
	Lamp Reminding Activate this function to display a reminder to change the lamp 30 hours before its expected end-of-life.	
	Lamp Hour Reset Choose "Yes" and press "ENTER" to turn the lamp hour counter to 0 hours.	
Language	Choose the multilingual OSD menu. Use the wey key to select your preferred menu language. • Press "ENTER" to confirm the selection.	

Note: Functions vary depending on model definition.

Audio

Volume	•	Press 🜒 to decrease the volume.
	•	Press to increase the volume.
Mute	•	Choose "On" to mute the volume.
	•	Choose "Off" to restore the volume.

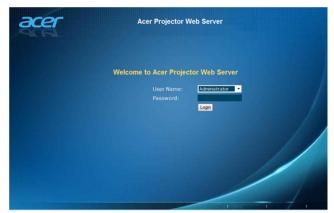

Acer LAN webpage management

How to login in

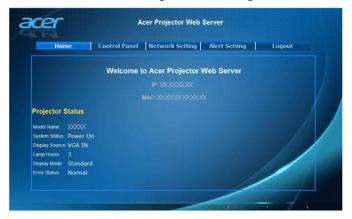

Open browser and enter the Server IP address by 192.168.100.10 to find below homepage of acer LAN webpage management. A password is needed to login in before using.

Select a user. **Administrator** is with high authority that can process more operations such as network setting and alert setting. Default password of administrator is "admin". And **User** is with normal authority with default password by "user". Click Login button to enter into homepage with correct password.

Home

Home page shows connection status and you can find three main functions listed, **Control Panel**, **Network Setting** and **Alert Setting**.

Note: Alert Setting and Network Setting are only for Administrator account.

Control Panel

Enduser can control and adjust projector setting value via this page.

Network Setting

Enduser can set IP address and password as wish. After change network configurations or password, projector will reboot automatically after press "Apply".

Alert Setting

Enduser can send mail with error message right away if projector has problem.

Logout

After tap Logout, you will return to login page within 5 seconds.

Note: Functions vary depending on model definition.

Appendices

Troubleshooting

If you experience a problem with your Acer projector, refer to the following troubleshooting guide. If the problem persists, please contact your local reseller or service center.

Image Problems and Solutions

#	Problem	Solution	
1	No image appears onscreen	 Connected as described in the "Getting Started" section. Ensure none of the connector pins are bent or broken. Check if the projector lamp has been securely installed. Please refer to the "Replacing the Lamp" section. Make sure you have removed the lens cap and the projector is switched on. 	
2	Partial, scrolling or incorrectly displayed image (for PC (Microsoft® Windows® 2000, XP, Vista®, Windows 1, Windows 10, Macintosh® OS compliant, ChromeOS Compliant))	For an incorrectly displayed image: Open "My Computer", open the "Control Panel", and then double-click the "Display" icon. Select the "Settings" tab. Verify that your display resolution setting is lower than or equal to WUXGA-RB (1920 x 1200). Click the "Advanced Properties" button. If the problem still appears, change the monitor display you are using and follow the steps below: Verify that the resolution setting is lower than or equal to WUXGA-RB (1920 x 1200). Click the "Change" button under the "Monitor" tab. Click "Show all devices". Next, select "Standard monitor types" under the SP box, and choose the resolution mode you need under the "Models" box. Verify that the resolution setting of the monitor display is lower than or equal to WUXGA-RB (1920 x 1200).	

3	Partial, scrolling or incorrectly displayed image (For notebooks)	 For an incorrectly displayed image: Follow the steps for item 2 (above) to adjust the resolution of your computer. Press the toggle output settings. Example:
4	The screen of the notebook computer is not displaying your presentation	If you are using a Microsoft® Windows® based notebook: Some notebook PCs may deactivate their own screens when a second display device is in use. Each has a different way to be reactivated. Refer to your computer's manual for detailed information. If you are using an Apple® Mac® OS based notebook: In System Preferences, open Display and select Video Mirroring "On".
5	Image is unstable or flickering	Adjust the "Tracking" to correct it. Refer to the "Image" section for more information. Change the display color depth settings on your computer.
6	Image has vertical flickering bar	Use "Frequency" to make an adjustment. Refer to the "Image" section for more information. Check and reconfigure the display mode of your graphics card to make it compatible with the projector.
7	Image is out of focus	 Make sure the lens cap is removed. Adjusts the focus ring on the projector lens. Make sure the projection screen is within the required distance of 3.3 to 30.3 feet (1.0 to 9.2 meters) from the projector. Refer to the "How to get a preferred image size by adjusting distance and zoom" section for more information.
8	Image is stretched when displaying a "widescreen" DVD title	 When you play a DVD encoded in anamorphic or 16:9 aspect ratio you may need to adjust the following settings: If you play a 4:3 format DVD title, please change the format to 4:3 in the projector OSD. If the image is still stretched, you will also need to adjust the aspect ratio. Set up the display format to 16:9 (wide) aspect ratio on your DVD player. If you play an Letterbox (LBX) format DVD title, please change the format to Letterbox (LBX) in the projector OSD.

	ı	i	ı	i
į			Ì	
	Ì			
		2	1	

9		Image is too small or too large	 Adjust the zoom ring on the projector. Move the projector closer to or further from the screen. Press "MENU" on the remote control. Go to "Image> Aspect Ratio" and try different settings or press "RATIO" on the remote control to adjust directly.
1	0	Image has slanted sides	If possible, reposition the projector so that it is centered on the screen.
1	1	Image is reversed	Select "Image> Projection" on the OSD and adjust the projection direction.

OSD Messages

#	Condition	Message Reminder	
1	Message	Fan Fail - the system fan is not working. Fan Fail. Lamp will automatically turn off soon.	
		 Projector Overheated - the projector has exceeded its recommended operating temperature and must be allowed to cool down before it may be used. Please check the following message. 	
		Projector overheated, system will turn off automatically soon, please: 1. Check if operation ambient temperature between 5 degree and 40 degree. 2. Check if filter needs to be cleaned. 3. Check if inlet or outlet is blocked. 4. Check if high altitude mode is set when the projector operating at high altitude area.	
		Replace the lamp - the lamp is about to reach its maximum lifetime. Prepare to replace it soon.	
		Lamp is approaching the end of its useful life in full power operation. Replacement suggested!	

Problems with the Projector

#	Condition	Solution
1	The projector stops responding to all controls	If possible, turn off the projector, then unplug the power cord and wait at least 30 seconds before reconnecting power.
2	Lamp burns out or makes a popping sound	When the lamp reaches the end of its useful life, it will burn out and may make a loud popping sound. If this happens, the projector will not turn on until the lamp module has been replaced. To replace the lamp, follow the procedures in the "Replacing the Lamp" section.

LED & Alarm Definition Listing

LED Messages

Replacing the Lamp

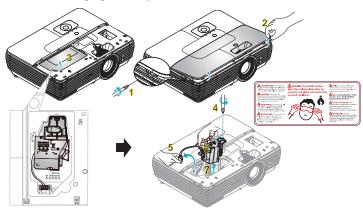

Use a screwdriver to remove the screw(s) from the cover, and then pull out the lamp.

The projector will detect the lamp life. You will be shown a warning message "Lamp is approaching the end of its useful life in full power operation.

Replacement suggested!" When you see this message, change the lamp as soon as possible. Make sure the projector has been cooling down for at least 30 minutes before changing the lamp.

Warning: The lamp compartment is hot! Allow it to cool down before changing the lamp.

To Change the Lamp

Turn off the projector by pressing the Power button.

Allow the projector at least 30 minutes to cool down.

Disconnect the power cord.

- 1 Use a screwdriver to remove the screw from the cover. (Illustration #1) Push to the direction of the arrow and push up the cover.. (Illustration #2) Remove the protector. (Illustration #3)
- 2 Remove the screw that secure the lamp module. (Illustration #4) Pull out the lamp plug. (Illustration #5) Lift the handle so that it stands up. (Illustration #6)
- 3 Pull out the lamp module by force. (Illustration #7)

To replace the lamp module, use a new lamp and reverse the above steps.

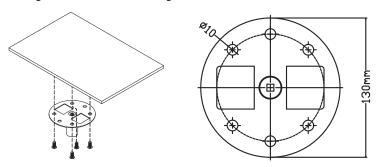

Warning: To reduce the risk of personal injury, do not drop the lamp module or touch the lamp bulb. The bulb may shatter and cause injury if it is dropped.

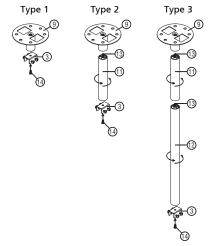

Ceiling Mount Installation

If you wish to install the projector using a ceiling mount, please refer to the steps below:

1 Drill four holes into a solid, structural ceiling member, and secure the ceiling mount base to the ceiling.

2 Choose the length combination based on actual environment. (CM-01S doesn't include Type 2 and Type 3.)

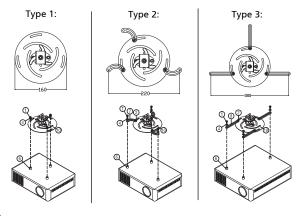

3 Type 1:

For the standard size use three bracket screws to mount the projector to the ceiling mount bracket.

Type 2 and Type 3:

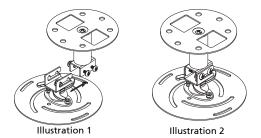

Alternatively, for the larger size, use the sliding extensions for more supports.

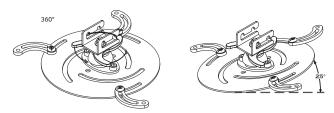

Note: It is recommended that you keep a reasonable space between the bracket and the projector to allow for proper heat distribution.

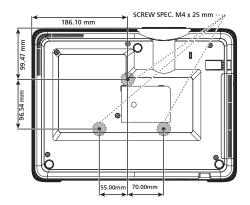

4 Connect the main body connector to the projector bracket (illustration 1), and then screw up four screws (illustration 2).

5 Adjust the angle and positioning as necessary.

Regulations and safety notices

FCC notice

This device has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the device and receiver.
- Connect the device into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for help.

Notice: Shielded cables

All connections to other computing devices must be made using shielded cables to maintain compliance with FCC regulations.

Notice: Peripheral devices

Only peripherals (input/output devices, terminals, printers, etc.) certified to comply with the Class B limits may be attached to this equipment. Operation with non-certified peripherals is likely to result in interference to radio and TV reception.

Caution

Changes or modifications not expressly approved by the manufacturer could void the user's authority, which is granted by the Federal Communications Commission, to operate this device.

Operation conditions

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Notice: Canadian users

This Class B digital apparatus complies with Canadian ICES-003.

Remarque à l'intention des utilisateurs canadiens

Cet appareil numérique de la classe B est conforme a la norme NMB-003 du Canada.

Declaration of Conformity for EU countries

Acer hereby declares that this projector series is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

Compliant with Russian regulatory certification

Radio device regulatory notice

Note: The regulatory information below is for models with wireless LAN and/or Bluetooth only.

General

This product complies with the radio frequency and safety standards of any country or region in which it has been approved for wireless use. Depending on configurations, this product may or may not contain wireless radio devices (such as wireless LAN and/or Bluetooth modules).

Canada — Low-power license-exempt radio communication devices (RSS-247)

- a Common information
 - Operation is subject to the following two conditions:
 - 1. This device may not cause interference, and
 - 2. This device must accept any interference, including interference that may cause undesired operation of the device.
- b Operation in 2.4 GHz band To prevent radio interference to the licensed service, this device is intended to be operated indoors and installation outdoors is subject to licensing.

List of applicable countries

This device must be used in strict accordance with the regulations and constraints in the country of use. For further information, please contact the local office in the country of use. Please see http://ec.europa.eu/enterprise/rtte/implem.htm for the latest country list.
