

Dell[™] 4100MP Projector User's Guide

Notes, Notices, and Cautions

NOTE: A NOTE indicates important information that helps you make better use of your projector.

S NOTICE: A NOTICE indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

CAUTION: A CAUTION indicates a potential for property damage, personal injury, or death.

Information in this document is subject to change without notice. $\textcircled{\sc 0}2004$ Dell Inc. All rights reserved.

Reproduction in any manner whatsoever without the written permission of Dell Inc. is strictly forbidden.

Trademarks used in this text: Dell and the DELL logo are trademarks of Dell Inc.; DLP and Texas Instruments are trademarks of Texas Instruments Corporation; Microsoft and Windows are registered trademarks of Microsoft Corporation; Macintosh is a registered trademark of Apple Computer, Inc.

Other trademarks and trade names may be used in this document to refer to either the entities claiming the marks and names or their products. Dell Inc. disclaims any proprietary interest in trademarks and trade names other than its own.

Restrictions and Disclaimers

The information contained in this document, including all instructions, cautions, and regulatory approvals and certifications, is based upon statements provided to Dell by the manufacturer and has not been independently verified or tested by Dell. Dell disclaims all liability in connection with any deficiencies in such information.

All statements or claims regarding the properties, capabilities, speeds, or qualifications of the part referenced in this document are made by the manufacturer and not by Dell. Dell specifically disclaims any knowledge of the accuracy, completeness, or substantiation for any such statements.

About Your Projector: Dell™ 4100MP Projector User's Guide

- <u>Features</u>
 <u>Equipment</u>
 <u>Main Unit</u>
- Control Panel
- Connection Ports
- Remote Control

Features

- □ Single chip 0.7" Texas Instruments DLP™ technology
- □ High contrast, double data rate (DDR) digital micro mirror device
- □ True XGA (1024 x 768) native resolution
- 6.5 lbs (2.95 kg) lightweight compact design
- 2200 max. ANSI lumens brightness *
- 2000:1 full on / full off contrast ratio
- 1.2x manual zoom lens
- Built in 2W stereo speakers
- Auto image re-sizing (Auto-Sync) to 1024x 768 full screen with scaling compression compatibility for UXGA, SXGA+, SXGA, XGA, SVGA, VGA, MAC
- Great connectivity Multiple PC and High Definition inputs (via M1-DA and RGB), S-Video, Composite Video (RCA), Component Video, and RS232
- Preset and user defined video modes for optimum video and graphic settings
- □ PIP (Picture In Picture) for dual signal source display
- LCD display for real time projector status
- Self-diagnostic for video troubleshooting
- State-of-the-art motion adaptive hardware de-interlacing with 3:2 and 2:2 pull down
- 250-watt user-replaceable UHP 1500-hour lamp
- Eco Mode allows end user to extend lamp life to 3000 hours by reducing the lamp wattage and brightness.
- □ Compatibility with Macintosh® computers
- Compatibility with NTSC, NTSC4.43, PAL, PAL-M, PAL-N, SECAM, and HDTV (1080i, 720p, 576i/p, 480i/p)
- High-definition TV compatibility
- Full featured RF Cordless remote control with mouse and laser pointer
- □ User-friendly, multi-language on-screen display (OSD)
- Advanced horizontal and auto vertical electronic keystone correction
- Semi-auto electronic keystone correction for image distortion
- Remote projector control from PC via RS232 port
- User-friendly control panel with backlight buttons
- Hard foam drop tested carrying case included
- □ Plug and play for photo image display from the option for memory card reader (Memory card module sold separately)
- □ Smart lens cap power management (Patent pending)

*Based on ANSI/NAPM IT7.228-1997 tests of 100 units, December 2003, with average ANSI Lumens 2000. Bulb brightness degrades with usage. Dell recommends replacing your bulb after 1500 hours usage.

Equipment

Your projector comes with all the items shown below. Ensure that you have all the items, and contact Dell if anything is missing

Main unit

1.8m M1-A to D-sub/USB cable

- 1.8m M1-A to HDTV cable
- 1.8m Composite Video cable

Main Unit

1	Control panel
2	LCD status display
3	Zoom tab
4	Focus ring
5	Lens
6	IR Remote control receiver
7	Elevator button

Control Panel

OPureGlare

1	Power button
2	Volume key
3	Source
4	Keystone adjustment
5	Auto Adjust (Re-sync)
6	Four directional keys
7	Keystone adjustment
8	Menu
9	Video Mode button
10	Lamp warning light
11	Temperature warning light

Connection Ports

1	IR receiver	
2	S-video connector	
3	Component RCA input connector	
4	VGA Out (monitor loop-through)	
5	12 Volt DC relay output	
6	Kensington lock hole	
7	RS232 connector	
8	M1-DA connector	
9	VGA In (D-sub) connector	
10	Power cord connector	
11	Video input connector	
12	Audio input connector	

Remote Control

1	Mute button	16	Power button
2	PIP (Picture In Picture) button	17	Freeze button
3	PIP swap button	18	Video Mode button
4	Slide show button	19	Source button
5	Rotate button	20	Pre-view
6	Program button	21	Normal button
7	Volume+ button	22	Four Directional pad
8	Zoom In	23	Zoom out
9	Left click	24	Right click
10	Volume- button	25	AV mode/ PC mode switch
11	Menu button	26	Page down button
12	Page up button	27	Horizontal Keystone+ button
13	Horizontal Keystone- button	28	Laser button
14	Auto vertical Keystone correction button	29	Blank Screen button
15	Auto adjust (re-sync) button		

 \wedge

CAUTION: The remote control has a Class II laser that emits radiation. To reduce the risk of injury to the eyes, do not look directly into the laser light on the remote control and do not point the laser light into anyone's eyes.

Battery Disposal: Your projector remote control uses zinc-manganese batteries. If you need to replace the batteries, see your Dell 4100MP Projector Quick Start Card.

Do not dispose of used batteries along with household waste. Contact your local waste disposal agency for the address of the nearest battery deposit site.

Back to Contents Page Installation: Dell™ 4100MP Projector User's Guide

•<u>Connecting the Projector</u> •<u>Powering On/Off the Projector</u> •<u>Adjusting the Projected Image</u> Changing the Lamp
 Installing the Card Reader (User purchasing option)

Connecting the Projector

A. To Computer: There are two possible methods of connecting to a computer.

1. Connecting with M1-A to D-sub/USB cable:

1	Power cord
2	M1-A to D-sub/USB cable

2. Connecting with D-sub to D-sub cable:

B. To DVD Player: There are three possible methods of connecting to a DVD player.

1. Connecting with component cable: There are three possible methods of using component cable for connecting to a DVD player.

1a) Connecting with M1-A to HDTV cable:

OPureGlare

1	Power cord	
2	M1-A to HDTV cable	

1b) Connecting with D-sub to YPbPr cable:

1	Power cord
2	D-sub to YPbPr cable

1c) Connecting with RCA to RCA cable:

1	Power cord
2	RCA to RCA component cable

2. Connecting with S-video cable:

OPureGlare

1	Power cord	
2	S-video cable	

3. Connecting with composite cable:

1	Power cord
2	Composite video cable

C. Professional Installation Options:

1.Installation for Driving Automatic Screen

2.Installation for wired RS232 remote control: There are two possible ways to connect with RS232 cable.

1a) Connection with PC:

2	RS232 cable
1	

1b) Connection with Commercial RS232 control box:

Note: RS232 cable not provided by Dell. Consult professional installer for cable and RS232 remote control software. Refer to RS232 pin assignment and com

Powering On/Off the Projector

Powering On the Projector

NOTE: Turn on the projector before you turn on the source.

- 1. Ensure that the lens cap has been removed.
- Ensure that the power cord and appropriate signal cable(s) are securely connected. The power button light will blink blue.
 Press the power button to turn on the projector. The Dell logo will be displayed for 30 seconds.
 Turn on your source (computer, notebook, DVD, etc.). The projector automatically detects your source.

- 1 If the "Searching for signal..." message appears on the screen, ensure that the appropriate signal cable(s) are securely connected.
- 1 If you are connecting multiple sources to the projector simultaneously, press the Source button on the remote control or control panel to select the desired source.

OPureGlare

Powering Off the Projector

DO NOT UNPLUG THE PROJECTOR BEFORE PROPERLY SHUTTING DOWN USING THE FOLLOWING STEPS.

1 Regular powering off procedures

- 1. Press the power button to turn off the projector. The "Power Off the Lamp?" message appears on the OSD.
- Press the power button again. The cooling fans continue to operate for 2 minutes.
 If the LAMP light is solid orange and the LCD display indicates that the lamp is defective, replace the lamp.
- 4. If the TEMP light is solid orange and the LCD display indicates that the projector is overheated, the projector has overheated. The display automatically shuts down. Turn the display on again after the projector cools down and the LCD message indicates there is no longer an overheated
- condition. If the problem persists, <u>contact Dell</u>.
 5. If the **TEMP** light is blinking orange and the LCD display indicates a fan failure, a projector fan has failed and the projector will automatically shut down. If this problem persists, <u>contact Dell</u>.
- 6. Disconnect the power cord from the electrical outlet and the projector.
- 7. If you press the power button while the projector is running, the "Power Off the Lamp?" message appears on the screen. To clear the message, press any button on the control panel or ignore the message; the message will disappear after 5 seconds.
- 1 Using lens cap for Smart Power Management
- Put on the lens cap to the projection lens. 1.
- After 10 seconds, the projector turns off automatically and the cooling fans continue to operate for 2 minutes.
 Disconnect the power cord from the electrical outlet and the projector.

Adjusting the Projected Image

Adjusting the Projector Height

To raise the projector:

- 1. Press the elevator button.
- 2. Raise the projector to the desired display angle, and then release the button to lock the elevator foot into position.
- 3. Use the tilt adjustment wheel to fine-tune the display angle.

To lower the projector:

- 1. Press the elevator button.
- 2. Lower the projector, and then release the button to lock the elevator foot into position.

OPureGlare

ACAUTION: To avoid damaging the projector, ensure that the zoom lens and elevator foot are fully retracted before moving the projector or placing the projector in its carrying case.

Adjusting the Projector Zoom and Focus

1. Rotate the zoom tab to zoom in and out.

2. Rotate the focus ring until the image is clear. The projector focuses at distances from 3.9 ft to 39.4 ft (1.2 m to 12 m).

1	Zoom tab
2	Focus ring

Adjusting Projection Image Size

Changing the Lamp

Replace the lamp when you see " Lamp is approaching the end of its useful life in full power operation. Replacement suggested!" message on the screen by carefully following these instructions. If this problem persists, contact Dell.

\rm CAUTION: The lamp becomes very hot with in use. Do not attempt to replace the lamp after use until the projector has been allowed to cool down for at least 30 minutes.

Lamp Changing Procedure:

- 1. Turn off the projector and disconnect the power cord.
- Let the projector cool for at least 30 minutes.
 Loosen the 2 screws that secure the lamp cover, and remove the cover.
- 4. Loosen the 3 screws that secure the lamp.
- 5. Pull up the lamp by its metal handle.
- 6.
- Reverse steps 1 through 5 to install the new lamp. Reset the lamp by usage time selecting the left Lamp Reset icon in the OSD 7. Management tab.
- 8. Dell may require that lamps replaced under warranty be returned to Dell. Otherwise, contact your local waste disposal agency for the address of the nearest deposit site.
- The lamp contains mercury. Disposal of this material may be regulated due to 9. environmental considerations. For disposal or recycling information, please contact your local authorities or the Electronic Industries Alliance: www.eiae.org.

L CAUTION: Do not touch the bulb or the lamp glass at any time. The bulb may explode due to improper handling, including the touching of the bulb or the lamp glass.

Installing the Plug and Play Memory Card Reader Module (Module sold separately)

To purchase the plug and play-memory card reader module for Dell projectors, please visit the Dell website at http://www.Dell.com/projectors for purchasing information.

1 Card Reader Installing Procedures

- Read the Quick Set Up Card in the card reader box before installation and assemble the module according to the instructions.
 Remove the dummy module installed in the projector by tilting the 2 clamps to loosen the connection and then pulling it out the projector as below
- figure. Insert the assembled card reader into the projector tenderly.

Federal Communications Commission (FCC) Notice (U.S. Only)

ONOTICE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate receiving antenna. 1
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:

- 1 This device may not cause harmful interference.
- 1 This device must accept any interference received including interference that may cause undesired operation.

Instructions to Users: This equipment complies with the requirements of FCC (Federal Communication Commission) equipment provided that the following conditions are met.

- 1. Power cable: Shielded power cable must be used.
- 2. Video inputs: The input signal amplitude must not exceed the specified level.

O NOTICE: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Declaration of Conformity

According to 47 CFR, Part 15 of the FCC Rules					
* For the following	named product:				
DLP Projector					
4100MP/DELL	CHC7229				

*	Mar	nufa	ctu	ed	at:

Mr. Vincent Lin

CE Declaration of Conformity for a Class B Digital Device

Directives to which conformity is declared: EMC Directives 89/336/EEC and Amending Directive 92/31/EEC And Low Voltage Directive 73/23/EEC Standards to which conformity is declared EN55022: 1998+A1:2000, Class B; EN55024: 1998+A1:2001; EN60950: 2000; EN61000-3-2: 2000; EN61000-3-3: 1995+A1:2001 Manufacturer's Name: Coretronic Corporation Manufacturer's Address: No 11, Li Hsing Rd, Science-Based Industrial Park, Hsinchu, Taiwan

Importer's Address:

Dell Products Europe BV Raheen Industrial Estate, Limerick, Ireland

Type of Equipment: DLP Projector Model Number(s): 4100MP Reference Report Number: Previously Declared Models: I, the undersigned, hereby declare that the equipment specified above conforms to the above Directive(s) and standards.

Hsinchu, Taiwan

incert Lin

December 01, 2003

Mr. Vincent Lin

Head of RD Center

Canadian Regulatory Information (Canada Only)

This digital apparatus does not exceed the Class B limits for radio noise emissions from digital apparatus set out in the Radio Interference Regulations of the Canadian Department of Communications.

Note that Industry Canada regulations provided, that changes or modifications not expressly approved by Dell Inc. could void your authority to operate this equipment.

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

Cet appareil numerique de la classe B respecte toutes les exigences du Reglement sur le materiel brouilleur du Canada.

1 Canada RSS-210/CNR210 (RF Remote Controller)

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (EIRP) is not more than that required for successful communication.

This Class B digital apparatus complies with Canada RSS-210. Cet appareil numérique de la classe B est conforme à la norme CNR-210 du Canada

The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

EN 55022 Compliance (Czech Republic Only)

This device belongs to Class B devices as described in EN 55022, unless it is specifically stated that it is a Class A device on the specification label. The following applies to devices in Class A of EN 55022 (radius of protection up to 30 meters). The user of the device is obliged to take all steps necessary to remove sources of interference to telecommunication or other devices.

Pokud není na typovém štitku počítače uvcdeno, že spadá do třídy A podle EN 55022, spadá automaticky do třídy B podle EN 55022. Pro zařízení zařazená do třídy A (ochranné pásmo 30m) podle EN 55022 plati následující. Dojde-li k rušeni telekomunikačních nebo jinych zařízení, je uživatel povinen provést taková opatření, aby rušeni odstranil.

VCCI Class 2 Notice (Japan Only)

This equipment complies with the limits for a Class 2 digital device (devices used in or adjacent to a residential environment) and conforms to the standards for information technology equipment that are set by the Voluntary Control Council for Interference for preventing radio frequency interference in residential areas.

Class B ITE

この装置は、情報処理装置等電波障害自主規制協議会(VCCI)の 基準に基づくクラス B 情報技術装置です。この装置は家庭環境で 使用することを目的としていますが、ラジオやテレビジョン受信機 に近接して使用されると、受信障害を引き起こすことがあります。 取扱説明書に従って正しい取り扱いをしてください。

MIC Notice (South Korea Only)

B Class Device

기종별	사용자 안내문
B급 기기 (가정용 정보통신기기)	이 기기는 가정용으로 전자파적합등록을 한 기기로서 주거지역 에서 는 물론 모든 지역에 서 사용할 수 있습니다.

Please note that this device has been approved for non-business purposes and may be used in any environment, including residential areas.

Polish Center for Testing and Certification Notice

The equipment should draw power from a socket with an attached protection circuit (a three-prong socket). All equipment that works together (computer, monitor, printer, and so on) should have the same power supply source.

The phasing conductor of the room's electrical installation should have a reserve short-circuit protection device in the form of a fuse with a nominal value no larger than 16 amperes (A).

To completely switch off the equipment, the power supply cable must be removed from the power supply socket, which should be located near the equipment and easily accessible.

A protection mark "B" confirms that the equipment is in compliance with the protection usage requirements of standards PN-93/T-42107 and PN-89/E-06251.

Wymagania Polskiego Centrum Badań i Certyfikacji

Urządzenie powinno być zasilane z gniazda z przyłączonym obwodem ochronnym (gniazdo z kołkiem). Współpracujące ze sobą urządzenia (komputer, monitor, drukarka) powinny być zasilane z tego samego źródła.

Instalacja elektryczna pomieszczenia powinna zawierać w przewodzie fazowym rezerwową ochronę przed zwarciami, w postaci bezpiecznika o wartości znamionowej nie większej niż 16Å (amperów).

W celu całkowitego wyłączenia urządzenia z sieci zasilania, należy wyjąć wtyczkę ka bla zasilającego z gniazdka, które powinno znajdować się w pobliżu urządzenia i być łatwo dostępne.

Znak bezpieczeństwa "B" potwierdza zgodność urządzenia z wymaganiami bezpieczeństwa użytkowania zawartymi w PN-93/T-42107 i PN-EN 55022:1996.

Jeźeli na tabliczce znamionowej umieszczono informację, że urządzenie jest klasy A, to oznacza to, że urządzenie w środowisku mieszkalnym może powodować zaktócenia radioelektryczne. W takich przypadkach moźna żądać od jego użytkownika zastosowania odpowiednich środków zaradczych.

Pozostałe instrukcje bezpieczeństwa

- Nie należy używać wtyczek adapterowych lub usuwać kołka obwodu ochronnego z wtyczki. Jeżeli konieczne jest użycie przedłużacza to należy użyć przedłużacza 3-żyłowego z prawidłowo połączonym przewodem ochronnym.
- System komputerowy należy zabezpieczyć przed nagłymi, chwilowymi wzrostami lub spadkami napięcia, używając eliminatora przepięć, urządzenia dopasowującego lub bezzakłóceniowego źródła zasilania.
- Należy upewnić się, aby nic nie leżało na kablach systemu komputerowego, oraz aby kable nie były umieszczone w miejscu, gdzie można byłoby na nie nadeptywać lub potykać się o nie.
- Nie należy rozlewać napojów ani innych płynów na system komputerowy.
- Nie należy wpychać żadnych przedmiotów do otworów systemu komputerowego, gdyż może to spowodować pożar lub porażenie prądem, poprzez zwarcie elementów wewnętrznych.
- System komputerowy powinien znajdować się z dala od grzejników i źródeł ciepła. Ponadto, nie należy blokować otworów wentylacyjnych. Należy unikać kładzenia luźnych papierów pod komputer oraz umieszczania komputera w ciasnym miejscu bez możliwości cyrkulacji powietrza wokół niego.

NOM Information (Mexico Only)

Safety Instructions: Dell™ 4100MP Projector User's Guide

Use the following safety guidelines to help protect your projector from potential damage and to ensure your own personal safety:

- 1 To reduce the risk of fire from the intense light emitted by the lens, do not put any object in front of or near the lens during operation.
- 1 (Hg) Lamp(s) inside this product contain mercury and must be recycled or disposed of according to local, state or Federal Laws. Or contact the electronic industries alliance: www.eiae.org for more information.
- 1 The surface beneath the projector might be hot with use. Be careful in handling the unit.
- 1 The lamp becomes very hot with use. Do not attempt to replace the lamp after use until the projector has been allowed to cool down for at least 30 minutes, and follow all instructions in "Changing the Lamp."
- 1 Do not touch the bulb or the lamp glass at any time. The bulb may explode due to improper handling, including touching the bulb or the lamp glass.
- 1 Remove lens cap before turning on projector.
- 1 To avoid damaging the projector and lamp, allow the cooling fan to run until it automatically turns off before turning off the projector.
- 1 Do not block the ventilation slots and openings on the projector.
- 1 Disconnect the power cord from the electrical outlet if the projector is not used for a long period of time.
- 1 Do not use the projector in an extremely hot, cold, or humid environment.
- Do not use the projector in areas susceptible to excessive dust and dirt.
- 1 Do not use the projector near any appliance that generates a strong magnetic field.
- 1 Do not place the projector in direct sunlight.
- 1 Do not look into the lens while the projector is on; the bright light may hurt your eyes.
- 1 To reduce the risk of fire or electric shock, do not expose the projector to rain or moisture.
- 1 To prevent electric shock, do not open or disassemble the projector further than what is needed for lamp replacement.
- 1 To avoid damaging the projector, ensure that the zoom lens and elevator foot are fully retracted before moving the projector or placing the projector in its carrying case.
- 1 Turn off the projector and disconnect it from the electrical outlet before cleaning it. Use a soft cloth moistened with mild detergent to clean the display housing. Do not use abrasive cleaners, waxes, or solvents.
- 1 The remote control is equipped with a Class II laser that emits laser radiation. To reduce the risk of injury, do not look directly into the laser light, and do not point the laser light into anyone's eyes.

Back to Contents Page Specifications: Dell™ 4100MP Projector User's Guide

Light Valve	Single-chip DLP™ DDR (double data rate) technology
Brightness	2200 Max. ANSI Lumens
Contrast Ratio	2000:1 Typical (Full On/Full Off)
Uniformity	70% Typical (Japan Standard)
Lamp	250-watt user-replaceable UHP 1500-hour lamp (up to 3000 hours in eco mode)
Number of Pixels	1024 x 768
Displayable Color	16.7M colors
Color Wheel Speed	120Hz(2X)
Projection Lens	F/2.43~2.66, f=28.0~33.6mm with 1.2x manual zoomed lens
Projection Screen Size	24.4-292.5 inches (diagonal)
Projection Distance	3.9~39.4 ft (1.2m–12m)
Vertical Keystone Correction	±40° (Max.)
Horizontal Keystone Correction	±16° (Max.)
Video Compatibility	NTSC, NTSC 4.43, PAL, PAL-M, PAL-N, SECAM, and HDTV (1080i, 720p, 576i/p, 480i/p) compatibility
	Composite video, Component video and S-video capability
H. Frequency	15kHz-100kHz (Analog)
	30kHz-75kHz (Digital)
V. Frequency	43Hz-120Hz (Analog)
	48Hz-85Hz (Digital)
Power Supply	Universal 90-240V AC 50-60Hz with PFC input
Power Consumption	320 watts typical
Audio	2 speakers, 2 watts per channel RMS
Noise Level	<36dB(A) Full-on mode, 33dB(A) Eco-mode
Weight	6.5 lbs (2.95 kgs)
Dimensions (W x H x D)	External 11.9 x 9.9 x 4.5 ± 0.04 inches (302 x 251 x 114.5 ± 1mm)
Environmental	Operating temperature: 5°C–35°C (41°F–95°F) Humidity: 80% maximum
	Storage temperature: -20°C to 60°C (-4°F to 140°F) Humidity: 80% maximum
Regulatory	FCC, CE, VCCI, UL, cUL, TüV GS, ICES-003, MIC, C-Tick, GOST, PCBC, CCC, PSB, EZU, NOM TüV/Argentina
I/O Connectors	
	Power: AC power input socket
	Computer input: one M1-DA for analog/digital/component, HDTV input signals, one 15-pin D-sub for analog input/ component, HDTV input signals
	Computer output: one 15-pin D-sub
	Video input: 3 RCA connectors for component video /HDTV input, one mini-DIN 4-pin S-video input, one RCA jack for composite video input
	Audio input: one phone jack (diameter 3.5mm)
	DC jack 12 volt @ 200mA output, relay control for automatic projection screen control
	One mini-DIN RS232 for wired remote projector control from PC

*Projector Response Message Table:

1 0x00: Success

1 0x00. Success
 1 0x01. Invalid Command (on the control command list but not valid. e.g. Card Reader command while no card reader plug-in)
 1 0x02: Error Command (includes CRC error and unknown commands)
 1 0x03: System Status – Projector ON (Normal Mode)
 1 NACK: System Status – Projector OFF (Standby More)

Note: When the projector is in the standby mode, no acknowledgement (NACK) response is sent by the projector.

*Projector Response Lamp Hour:

1 -> Byte0, Byte1, Byte2

Byte0: 0x2F (the header of the lamp hour)
Byte1: LSB (Hex)
Byte2: MSB (Hex)

Ex:800 (3x256+2x16=800) hours --> 0x2F, 0x20, 0x03

*Firmware Version Response:

1 -> 4 Bytes ASCII Code: "V*.*" V: Version *: 0-9

Ex: Version 1.5 -> "V1.5"

Note: Control codes in Dark Blue and the projector response codes were added to 4100MP projectors manufactured after September, 2004.

Troubleshooting: Dell™ 4100MP Projector User's Guide

- <u>No image appears on the screen</u>
 <u>Partial, scrolling, or incorrectly displayed image</u> The screen does not display your presentation
- Image is unstable or flickering
 Image has vertical flickering bar
- Image color is not correct
- Image is out of focus
- The image is stretched when displaying 16:9 DVD
- Image is reversed Lamp is burned out or makes a popping sound
- Self-diagnostic for video
- The remote control is not operating smoothly or operating in very limited range

If you experience problems with your projector, see the following troubleshooting tips. If the problem persists, contact Dell.

No image appears on the screen

- 1 Ensure that the lens cap is removed and the projector turned on.
- 1 Ensure the external graphics port of the portable computer is enabled. If you are using a Dell portable computer, press 📠 For other computers, consult your owner's manual.
- 1 Ensure that all the cables are securely connected as described in "Connecting the Projector."
- Ensure that the pins of the connectors are not bent or broken.
- 1 Ensure that the lamp is securely installed (see "Changing the Lamp").
- 1 Run "Self-diagnostic test" (see "Self-diagnostic for video") for preliminary diagnostic on projection problem for video. Ensure that the colors of the test pattern are correct.

Partial, scrolling, or incorrectly displayed image

- 1 Press the Auto Adjust button on the remote control or the control panel.
- 1 If you are using a Dell portable computer (for other computers consult your owner's manual):
 - 1. Set the resolution of the computer to XGA (1024 x 768):
 - 1a) Right click on the unused portion of your Windows desktop-» Properties-» Settings tab.

1b) Verify the "Screen area" slide bar is set to 1024x 768 pixels for the external monitor port.

- 2. Press Fn Press
- 1 If you experience difficulty in changing resolutions or your monitor freezes, restart all the equipment and the projector.

The screen does not display your presentation

If you are using a portable computer, press in the second s

Image is unstable or flickering

1 Adjust the tracking in the OSD Computer Image tab.

Image has vertical flickering bar

Adjust the frequency in the OSD Computer Image tab.

Image color is not correct

- I If your graphic card output signal is "Sync on Green", and you would like to display VGA at 60Hz signal, please go into "OSD-> Management -> Signal Type" and select "RGB".
- Run "Self-diagnostic test" (see "<u>Self-diagnostic for video</u>") for preliminary diagnostic on image color problem. Ensure that the colors of the test pattern are correct.

Image is out of focus

- Adjust the focus ring on the projector lens.
- 1 Ensure that the projection screen is within the required distance from the projector (3.9ft [1.2m] to 39.4ft [12m]).

The image is stretched when displaying 16:9 DVD

The projector automatically detects 16:9 DVD and adjusts the aspect ratio to full screen with a 4:3 (letter-box) default setting. If the image is still stretched, adjust the aspect ratio as follows:

- I If you are playing a 16:9 DVD, select 4:3 aspect ratio type on your DVD player if capable.
- I If you cannot select 4:3 aspect ratio type on your DVD player, select 4:3 aspect ratio in the "All Images" menu within the OSD function.

Image is reversed

1 Select Management from the OSD and adjust the projection mode.

Lamp is burned out or makes a popping sound

When the lamp reaches its end of life, it may burn out and may make a loud popping sound. If this occurs, the projector will not turn back on, and will display "Lamp Failure" in the LCD display until the lamp is replaced. To replace the lamp, see "Changing the Lamp".

Self-diagnostic for video

- Dell 4100MP Projector provides self-diagnostic test of the projector video display (for Video, S-video, and Component-i). Use this advanced feature for preliminary self-diagnostic on your projector when encountering the display problem for video.
- 1 After turning on the projector, press "+" and "-" buttons on the control panel simultaneously and release the buttons when screen goes blank.
- Press "+" and "-" buttons again to exit the diagnostic mode.
- While in Self-diagnostic mode, the screen will run a seven-color-cycle test as following: "Red-> Green-> Blue-> White-> Watchet Blue-> Dark Green-> Yellow." Ensure that the colors of the test pattern are correct. Contact Dell if the colors are not displayed correctly.

The remote control is not operating smoothly or operating in very limited range

When the remote projector control is not smooth or operating in very limited range, please follow below procedures for troubleshooting.

1. Battery low? Check if the laser beam transmitted from the remote is too dim. If it is, replace it with 2 new AA batteries.

2. If the batteries are not low, the projector may be operating in very "noisy" RF environment with the interference from other wireless devices. Use "RF Learning" to solve the interference problem.

Back to Contents Page Using Your Projector: Dell™ 4100MP Projector User's Guide

<u>Control Panel</u>
 <u>Remote Control</u>
 <u>On-Screen Display</u>

Control Panel

00 0 0 (+)©

Power

See "Powering On/Off the Projector."

Volume

Increases or decreases the speaker volume.

Video Mode

Switches the display mode to PC Mode, Movie Mode, Game Mode, sRGB Mode, User Mode.

Source

Press 🔁 to step through Analog RGB, Composite, Component-i, S-video, and Analog YPbPr sources, and photo image from the card reader (Optional accessory) when multiple sources are connected to the projector.

Auto Adjust

Press 💽 to synchronize the projector to the input source. Auto-Adjust will not operate if the <u>OSD</u> (On-Screen Display) is displayed.

Menu

Press (a) to activate the OSD. Use the directional keys and Menu button to navigate through the OSD.

Four Directional Keys

Keystone Adjustment

Press or button to adjust image distortion caused by tilting the projector.

Remote Control

Power

See "Power On/Off the Projector."

Source

Press the **Source** button to switch between Analog RGB, Digital RGB, Composite, Component-i, S-video, Analog YPbPr sources, and the card reader (Optional accessory).

Freeze

Press the Freeze button to temporarily stop motion video. Press the button again to resume.

Mute

Press the Mute button to mute or un-mute the projector speaker.

PIP

Press the **PIP** button to turn on/off the PIP screen.

PIP Swap

Press the PIP Swap button to swap the foreground and background display sources.

Slide Show (Enabled only when projection with the photo images from the optional card reader) Press the Slide Show button to display all the photo images in the memory card one by one.

Pre-view (Enabled only when projecting photo images from the optional card reader) Press the Pre-view button to browse thumbnails of all the photo image files.

Normal (Enabled only when projecting photo images from the optional card reader) Press the Normal button to display the photo images one by one manually controlled by Page Up or Page Down button.

Rotate (Enabled only when projecting photo images from the optional card reader) Press the Rotate button to rotate the image on the screen.

Auto Adjust (Re-sync)

Press [+] to synchronize the projector to the input source. Auto Adjust will not operate if the OSD (On-Screen Display) is displayed.

Prgm (Program)

Initiates the Learning Mode on the remote control for switching the RF transmission channel by pressing prgm button.

Directional Keys

Use (•) or (•) to select OSD items, use "left" and "right" button to make adjustments. The **AV/PC** mode button has to be switched to AV position for activating the Up, Down, Left, and Right function on navigator button. In the PC position, these keys emulate PC keyboard commands.

Zoom In/Out

Press the e button to digitally magnify an image up to 32 times on the screen. Press the e button to reduce the zoomed image.

Left Click 💩

Mouse left click.

Right Click 🔬

Mouse right click.

Blank Screen

Press Blank Screen button to hide the image, press again to resume display of the image.

Video Mode

The Dell 4100MP Micro-projector has preset configurations that are optimized for displaying data (PC Graphics) or video (movies, games, etc.). Press Video Mode button to toggle between PC mode, Movie mode, Game Mode, sRGB, or User mode (for user to setup and save preferred settings). Pressing the Video Mode button once will show the current display mode. Pressing the Video Mode button again will switch between modes.

AV/PC

Switch AV Mode and PC Mode by shifting the AV/PC button. At PC Mode, the mouse function will be enabled. While at AV Mode, the Volume+/-, and Zoom In/Out buttons on remote mouse pad will be enabled. Or Up, Down, Left and Right directional buttons for OSD control when menu pops up on the screen.

Page UP

Press the Page Up button to step to previous page.

Page Down

Press the Page Down button to step to next page.

Menu

Press the Menu button to activate the OSD. Use the directional keys and Menu button to navigate through the OSD.

Volume +/-

Press the Vol+ button to increase the volume, press the Vol- button to reduce the volume. (Enabled only when AV/PC button switches to A/V mode)

Horizontal Keystone- D+

Adjust image distortion caused by horizontal shifting of the projector orientation.

Auto Vertical keystone correction

Press the button to adjust the image distortion caused by tilting the projection AUTOMATICALLY.

Laser

Aim the remote control at the screen, and press and hold the Laser button to activate the laser light.

On-Screen Display

- 1 The projector has a multi-language On-Screen Display (OSD) that can be displayed with or without an input source present.
- 1 The OSD allows you to make image adjustments and change a variety of settings. If the source is a computer, the OSD allows changes to the Computer Image tab. When using a video source, the OSD allows changes to the Video Image tab. The projector automatically detects the source.
- When the OSD is on the screen, press (→) or (→) to navigate through the OSD tabs. Example: All Images-> Computer Image-> Audio-> Management-> Language-> Factory Reset. To make a selection in a tab, press () on keypad or "Menu" on remote controller.
- Press () or () to make a selection and adjust the settings by pressing () or () on keypad or Left and Right button on the remote controller. When an item is selected, the color of the item will change to dark blue.
- 1 To exit the OSD, go to "Exit" tab and press (a) button on keypad or "Menu" on remote controller.

Adjust the brightness of the image. ¢ — Brightness ÷

Press → to darken the image.
 Press + to lighten the image.

Contrast

Control the degree of difference between the brightest and darkest parts of the picture. Adjusting the contrast changes the amount of black and white in the image.

Con	trast	•	_	9 50	
1	Press (-) to decre	ase the	contrast.	
1	Press 4	to increa	ase the o	contrast.	

Color Temp.

Adjust the color temperature. With the higher temperature, the screen looks more blue; with the lower temperature, the screen looks more red. User mode activates the values in the "color setting" menu.

User Color

User Color		
	Color Setting	
Red		128
Green		128
Blue		128

This mode allows manual adjustment of red, green, and blue color settings. Modifying these values will automatically change the color temperature to "user".

V. Keystone

Adjust the image distortion caused by tilting the projector.

H. Keystone

Adjust the image distortion caused by horizontal shifting of the projector orientation.

Auto Keystone

- Select On to enable the auto correction for vertical image distortion due to tilting the projector. 1
- Select Off to disable the auto correction.

Semi-Auto Keystone

Semi-Auto Keystone On

Select On to activate the semi-auto keystone correction for image distortion. A specific image pattern will be present on the screen once it's been activated and then complete the settings by following below instructions.

- Adjust the projected image display to appropriate location on the screen. Starting with positioning for first corner on top-left of the screen, use the **Navigator** button to move the cursor to 1
- preferred location within the image display area and press Menu button to confirm the positioning. Complete the positioning for the rest 3 corners clockwise by the same instruction as above.
- After the positioning for 4 corners is completed, the image display will be projected on the screen according to the designated corner location.

Zoom

- Press (+) to digitally magnify an image up to 32 times on the projection screen.
- Press (-) to reduce the zoomed image.

Aspect Ratio

Select this function to fit 1:1, 16:9 or 4:3 aspect ratio. In order to use the 1:1 aspect ratio, the input must be a computer signal (through VGA cable) less than XGA (1024 x 768), component 576p/ 480i / 480p, S-Video, or Video (composite). If the input signal is a computer signal greater than XGA or component 1080i / 720p, only 16:9 or 4:3 aspect ratio will be available. When an icon is selected, the color of the icon will change to dark blue.

1:1: The input source will be displayed without scaling.

16:9:The input source will be displayed in wide screen mode (16:9) without scaling. The source will be scaled to fit the width of the screen.

4:3: The input source will be scaled to fit the screen.

Video Mode

Select this function to optimize the display image for home use (**Movie Mode** or **Game Mode**), conference use (**PC Mode**) or as user preferable settings (**User Mode**), or use **sRGB** mode for more accurate color representation. When an icon is selected, the color of the icon will change to dark blue. Adjusting the settings of **White Intensity** or **Degamma** tab, will select User Mode automatically.

White Intensity

- Setting 10 will maximize the brightness
- 1 Setting 0 will maximize color reproduction quality.

Degamma

Degamma can be adjusted between 1 and 4. Default setting is 3 (Recommended). Adjustment of the setting will change the color performance of the display.
