

marantz®

Model VP-11S1 User Guide

DLP™ Projector

CAUTION

RISK OF ELECTRIC SHOCK
DO NOT OPEN

**CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK,
DO NOT REMOVE COVER (OR BACK)
NO USER-SERVICEABLE PARTS INSIDE
REFER SERVICING TO QUALIFIED SERVICE PERSONNEL**

The lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.

WARNING

**TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK,
DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE.**

**CAUTION: TO PREVENT ELECTRIC SHOCK, MATCH WIDE BLADE OF
PLUG TO WIDE SLOT, FULLY INSERT.**

**ATTENTION: POUR ÉVITER LES CHOC ÉLECTRIQUES, INTRODUIRE
LA LAME LA PLUS LARGE DE LA FICHE DANS LA BORNE
CORRESPONDANTE DE LA PRISE ET POUSSER JUSQU’AU FOND.**

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by tuning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

NOTE:

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

IMPORTANT SAFETY INSTRUCTIONS

READ BEFORE OPERATING EQUIPMENT

This product was designed and manufactured to meet strict quality and safety standards. There are, however, some installation and operation precautions which you should be particularly aware of.

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacture's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.

13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

Additional Safety Information!

- This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer’s instructions have been adhered to.
- Apparatus shall not be exposed to dripping or splashing and that no objects filled as vases, shall be placed on the apparatus.
- When the switch is in the OFF position, the apparatus isn’t completely switched-off from the MAINS.

ENGLISH

FOREWORD

This section must be read carefully before any connection is made to the mains supply.

WARRANTY

For warranty information, contact your local Marantz distributor.

RETAIN YOUR PURCHASE RECEIPT

Your purchase receipt is your permanent record of a valuable purchase. It should be kept in a safe place to be referred to as necessary for insurance purposes or when corresponding with Marantz.

IMPORTANT

When seeking warranty service, it is the responsibility of the consumer to establish proof and date of purchase. Your purchase receipt or invoice is adequate for such proof.

FOR U.K. ONLY

This undertaking is in addition to a consumer's statutory rights and does not affect those rights in any way.

EQUIPMENT MAINS WORKING SETTING

Your Marantz product has been prepared to comply with the household power and safety requirements that exist in your area.

COPYRIGHT

Recording and playback of some material may require permission. For further information refer to the following:

- Copyright Act 1956
- Dramatic and Musical Performers Act 1958
- Performers Protection Acts 1963 and 1972
- Any subsequent statutory enactments and orders

WARNINGS

- Do not expose the equipment to rain or moisture.
- Do not remove the cover from the equipment.
- Do not insert anything into the equipment through the ventilation holes.
- Do not handle the mains lead with wet hands.
- Do not cover the ventilation with any items such as tablecloths, newspapers, curtains, etc.
- No naked flame sources, such as lighted candles, should be placed on the equipment.
- When disposing of used batteries, please comply with governmental regulations or environmental public instruction's rules that apply in your country or area.
- Do not place anything about 1 meter above the top panel.
- Make a space of about 0.2 meter around the unit.
- When the projector is mounted on the ceiling, the Ceiling Mount Kit approved by MARANTZ must be used for installation.
- Do not look into the lens when the projector is turned on. It could damage your eyesight.
- Unplug the projector from the wall outlet if it is not to be used for a few days.
- When the switch is in the OFF position, the apparatus is NOT disconnected from the AC supply mains.
- The socket-outlet shall be installed near the equipment and shall be easily accessible.
- No objects filled with liquids, such as vases, shall be placed on the apparatus.

Lamp Handling Precautions

DANGER

This SHP uses a high voltage glass mercury vapor lamp. The lamp can break or fail to light if handled wrongly during replacement or because of the projector's surrounding temperature.

Lamp life also varies according to the lamp with some even breaking or failing to light as soon as they are used the first time. If the lamp breaks, glass fragments may be scattered inside the lamp unit and projector, and gas inside the lamp bulb that contains mercury vapor may be emitted from the projector's vent.

Before use, carefully read the projector user guide and the lamp replacement instructions. Remember to handle the lamp with care. In the event of serious trouble, call for Marantz authorized dealer.

- Do not look directly into the lamp with bare eyes while lit. The bright light can cause sore eyes and impair vision.
- Do not directly expose skin to the light of the lamp. Direct exposure can inflame the skin.
- Do not drop, impact, subject to excessive force or otherwise damage the lamp.
- Replacing the lamp runs the risk of burns and electric shock, therefore shut OFF power supply, unplug the AC power cord from AC power outlet and wait at least 60 minutes for the lamp to cool down before attempting to replace it.
- If the lamp breaks, unplug the AC power cord from AC power outlet and call for Marantz authorized dealer to replace it. Do not replace the lamp yourself or clean up broken glass inside the projector as this can result in cuts and burns to you or damages inside the projector.
- If the projector is hung from a ceiling or installed in a high place, it is extremely dangerous to replace the lamp. In this case, do not replace or handle the damaged lamp yourself.

CAUTION

- The chance of the lamp breaking is high after extended use. It is recommended to replace the lamp when near the end of its designed life. Do not use a lamp beyond the maximum lighting time.
- Use only Marantz original lamp units. Check the model code of the lamp unit matches that in the user guide.
- Before replacing the lamp, read carefully "Lamp Unit Replacement" in the user guide. Replace the lamp as explained therein.
- Entrust disposal of a used lamp to a licensed industrial waste handler or return it to the place of purchase. Do not break the lamp or discard with general waste.
- If the lamp breaks, leave the area immediately and stay away for at least 30 minutes, and ventilate the room so as not to inhale the mercury vapor.
- If you inhale the mercury vapor, see a physician immediately and follow his instructions.

FRANÇAIS

AVANT-PROPOS

Prière de lire ce chapitre avant de brancher l'appareil sur le secteur.

GARANTIE

Pour des informations sur la garantie, contacter le distributeur local Marantz.

CONSERVER L'ATTESTATION D'ACHAT

L'attestation d'achat est la preuve permanente d'un achat de valeur. La conserver en lieu sûr pour s'y reporter aux fins d'obtention d'une couverture d'assurance ou dans le cadre de correspondances avec Marantz.

IMPORTANT

Pour l'obtention d'un service couvert par la garantie, il incombe au client d'établir la preuve de l'achat et d'en corroborer la date. Le reçu ou la facture constituent des preuves suffisantes.

REGLAGE DE L'ALIMENTATION

SECTEUR DE L'APPAREIL

Cet appareil Marantz a été conçu pour respecter les exigences de votre région en matière d'alimentation secteur et de sécurité.

DRUITS D'AUTEUR

L'enregistrement et la lecture de certaines informations sonores nécessitent une autorisation. Pour de plus amples renseignements, consultez:

- La loi de 1956 sur les Copyright
- Loi concernant les Acteurs et Musiciens 1958
- Lois de Protection des Artistes 1963 et 1972
- Les décrets et règlements ultérieurs qui s'y rapportent

AVERTISSEMENTS

- Ne pas exposer l'appareil à la pluie ni à l'humidité.
- Ne pas essayer de retirer le boîtier de l'appareil.
- Ne rien insérer dans l'appareil par les orifices de ventilation.
- Ne pas manipuler le cordon d'alimentation avec les mains mouillées.
- Ne pas recouvrir les ouïes de ventilation avec un objet quelconque comme une nappe, un journal, un rideau, etc.
- Ne pas placer aucune source de flamme nue, comme une bougie allumée, sur l'appareil.
- Pour mettre au rebut les piles usées, respecter les lois gouvernementales ou les règlements officiels concernant l'environnement qui s'appliquent à votre pays ou région.
- Ne placer aucun objet à moins d'un mètre environ du panneau supérieur.
- Veiller à ce qu'aucun objet ne soit à moins de 0,2 mètre des côtés de l'appareil.
- Pour monter le projecteur au plafond, vous devez utiliser un kit de montage au plafond approuvé par MARANTZ pour l'installation.
- Ne regardez pas dans l'objectif quand le projecteur est allumé. Cela pourrait endommager votre vue.
- Débranchez le projecteur de la prise murale s'il ne doit pas être utilisé pendant plusieurs jours.
- Quand l'interrupteur d'alimentation est sur la position OFF, l'appareil N'EST PAS déconnecté de l'alimentation secteur.
- La prise secteur doit être située près de l'appareil et accessible facilement.
- Aucun objet rempli de liquide, un vase par exemple, ne doit être placé sur l'appareil.

Précautions à prendre pour la manipulation de la lampe

DANGER

Ce SHP utilise une lampe à vapeur de mercure en verre à haute tension. Cette lampe peut se casser ou ne pas s'allumer si elle est manipulée incorrectement pendant son remplacement ou du fait de la température ambiante du projecteur.

La durée de service d'une lampe varie aussi en fonction de la lampe, certaines se cassant ou ne s'allumant pas aussitôt qu'elles sont utilisées pour la première fois. Si la lampe se casse, des fragments de verre peuvent se répandre à l'intérieur de l'unité lampe et du projecteur, et le gaz à l'intérieur de l'ampoule de la lampe qui contient de la vapeur de mercure peut être émis par l'orifice du projecteur.

Avant utilisation, lisez attentivement le guide de l'utilisateur du projecteur et les instructions de remplacement de la lampe. Pensez à manipuler la lampe avec précautions. En cas de problème sérieux, contactez un distributeur agréé Marantz.

- Ne regardez pas directement la lampe sans protection pour les yeux pendant qu'elle est allumée. Sa lumière brillante peut faire mal aux yeux et affaiblir la vue.
- N'exposez pas directement la peau à la lumière de la lampe. Une exposition directe peut provoquer une inflammation de la peau.
- Ne laissez pas tomber la lampe, ne la heurtez pas, ne la soumettez pas à une force excessive ni ne l'endommager.
- Le remplacement de la lampe fait courir un risque de brûlure et de choc électrique ; il faut donc couper l'alimentation électrique, débrancher le cordon d'alimentation secteur de la prise secteur et attendre au moins 60 minutes que la lampe refroidisse avant d'essayer de la remplacer.
- Si la lampe se casse, débranchez le cordon d'alimentation secteur de la prise secteur et contactez un distributeur agréé Marantz pour qu'il la remplace. Ne remplacez pas la lampe vous-même ni ne nettoyez le verre brisé à l'intérieur du projecteur car vous pourriez vous couper et vous brûler ou endommager l'intérieur du projecteur.
- Si le projecteur est accroché au plafond ou installé dans un endroit en hauteur, il est extrêmement dangereux de remplacer la lampe. Dans ce cas, ne remplacez ni ne manipulez vous-même la lampe endommagée.

ATTENTION

- Le risque que la lampe se casse est élevé après une utilisation prolongée. Il est recommandé de remplacer la lampe lorsqu'elle approche de sa durée de service spécifiée. N'utilisez pas une lampe au-delà du temps d'éclairage maximum.
- N'utilisez que des unités lampes d'origine Marantz. Vérifiez que le code de modèle de l'unité lampe correspond à celui indiqué dans le guide de l'utilisateur.
- Avant de remplacer la lampe, lisez attentivement "Remplacement de l'unité lampe" dans le guide de l'utilisateur. Remplacez la lampe conformément aux explications de cette section.
- Confiez la mise au rebut d'une lampe usée à un service de déchets industriels licencié ou retournez-la où vous l'avez achetée. Ne cassez pas la lampe ni ne la jetez avec les ordures ménagères.
- Si la lampe se casse, sortez immédiatement de la zone pendant au moins 30 minutes, et aérez la pièce afin de ne pas inhaler la vapeur de mercure.
- Si vous inhalez de la vapeur de mercure, consultez immédiatement un médecin et suivez ses instructions.

ESPAÑOL

PROLOGO

Antes de conectar el equipo a la corriente, debe leer este capítulo.

GARANTIA

Para obtener información acerca de la garantía póngase en contacto con su distribuidor Marantz.

GUARDE SU RECIBO DE COMPRA

Su recibo de compra es su prueba permanente de haber adquirido un aparato de valor. Este recibo deberá guardarlo en un lugar seguro y utilizarlo como referencia cuando tenga que hacer uso del seguro o se ponga en contacto con Marantz.

IMPORTANTE

Cuando solicite el servicio otorgado por la garantía el usuario tiene la responsabilidad de demostrar cuando efectuó la compra. En este caso, su recibo de compra será la prueba apropiada.

SELECCION DEL VOLTAJE DE

ALIMENTACION

Este producto Marantz se ha preparado para estar conforme con los requisitos de alimentación eléctrica doméstica y de seguridad que hay en su zona.

COPYRIGHT

La grabación y reproducción de determinado material puede necesitar permiso. Para más información consulte lo siguiente:

- Acta sobre copyright de 1958
- Acta de la Sociedad General de Autores de 1958
- Acta de Protección de la Propiedad Intelectual de Autores de 1963 y 1972
- Cualquier acta, estatuto y órdenes subsiguientes

ADVERTENCIAS

- No exponga el equipo a la lluvia ni a la humedad.
- No extraiga la tapa del equipo.
- No introduzca nada en el interior del equipo a través de los orificios de ventilación.
- No maneje el cable de alimentación con las manos mojadas.
- No cubra la ventilación con objetos como manteles, periódicos, cortinas, etc.
- No deben colocarse sobre el equipo elementos con fuego, por ejemplo velas encendidas.
- Cuando se eliminen baterías usadas, deben cumplirse las reglamentaciones oficiales o las normas de protección medioambiental aplicables en su país o en su zona.
- No ponga nada a menos de 1 metro por encima del panel superior.
- Deje un espacio de unos 0,2 metro alrededor de la unidad.
- Cuando el proyector se monte en el techo deberá utilizarse para la instalación el juego de montaje en el techo aprobado por MARANTZ.
- No mire al objetivo cuando el proyector esté encendido. Podría lesionarse la vista.
- Desenchufe el proyector de la toma de corriente si no lo va a utilizar durante unos pocos días.
- Cuando el interruptor esté en la posición OFF, el aparato NO estará desconectado de la fuente de alimentación de CA.
- La toma de corriente deberá estar instalada cerca del equipo y deberá poderse acceder a ella fácilmente.
- No se deben colocar sobre el aparato recipientes que contengan líquidos, como por ejemplo jarrones.

Precauciones para la manipulación de la lámpara

PELIGRO

Esta lámpara SHP de vidrio y de alto voltaje contiene vapor de mercurio. La lámpara puede romperse o no encenderse si es manipulada incorrectamente durante el recambio o debido a la temperatura ambiente del proyector.

La vida útil también varía según las lámparas, algunas de las cuales se rompen o no se encienden al cabo del primer uso. Si la lámpara se rompe, los fragmentos de cristal se pueden desparramar por el interior de la unidad de la lámpara y del proyector, y el gas con vapor de mercurio contenido en la bombilla se puede escapar a través del sistema de ventilación del proyector.

Antes de usar el aparato, lea con cuidado la guía de usuario del proyector y las instrucciones de recambio de la lámpara. No olvide manipular con cuidado la lámpara. En caso de producirse problemas serios, avise a un distribuidor autorizado de Marantz.

- No mire directamente a la lámpara sin protección en los ojos cuando ésta esté encendida. La luz brillante puede irritar los ojos e impedir la visión.
- No exponga directamente la piel a la luz de la lámpara. La exposición directa puede inflamar la piel.
- No deje caer la lámpara, ni la golpee, ni la someta a presiones excesivas, ya que de lo contrario la lámpara se daña.
- El recambio de la lámpara entraña el riesgo de quemaduras y descargas eléctricas, y por lo tanto, deberá apagar el aparato, desenchufar el cable de alimentación del tomacorriente de CA, y esperar al menos 60 minutos a que la lámpara se enfríe antes de intentar recambiarla.
- Si la lámpara se rompe, desenchufe el cable de alimentación de CA y avise a un distribuidor autorizado de Marantz para recambiarla. No recambie la lámpara usted mismo ni limpie los cristales rotos en el interior del proyector, pues podría sufrir cortes y quemaduras y ocasionar daños en el interior del proyector.
- Si el proyector cuelga del techo o está instalado en un lugar elevado, el recambio de la lámpara es extremadamente peligroso. En tal caso, no recambie ni manipule usted mismo la lámpara dañada.

PRECAUCIÓN

- La probabilidad de que la lámpara se rompa es alta después de un uso prolongado. Se recomienda recambiar la lámpara cerca de la fecha de expiración de su vida útil prevista. No utilice una lámpara más tiempo del máximo de iluminación previsto.
- Utilice sólo lámparas originales de Marantz. Compruebe que el código del modelo de la lámpara coincide con el de la guía de usuario.
- Antes de recambiar la lámpara, lea atentamente la sección "Recambio de la lámpara" en la guía de usuario. Recambie la lámpara tal y como viene allí explicado.
- Confíe el desecho de la lámpara usada a un manipulador autorizado de desechos industriales o devuélvala al lugar donde la compró. No rompa la lámpara ni la deseche en la basura normal.
- Si la lámpara se rompe, abandone la zona inmediatamente y permanezca alejado durante al menos 30 minutos, ventilando la habitación con objeto de no inhalar el vapor de mercurio.
- Si inhala vapor de mercurio, consulte inmediatamente a su médico y siga sus instrucciones.

PORTUGUÊS

INTRODUÇÃO

Esta secção deverá ser lida antes de efectuar qualquer ligação à corrente.

GARANTIA

Para informações sobre a garantia, contactar o distribuidor Marantz local.

GUARDAR O RECIBO DE COMPRA

O recibo é o registo permanente da compra que fez. Deve ser guardado num local seguro, para ser apresentado em questões relacionadas com o seguro ou para quando tiver de contactar a Marantz.

IMPORTANTE

Quando procurar assistência técnica ao abrigo da garantia, é da responsabilidade do consumidor estabelecer a prova e data de compra. O recibo é prova adequada.

REGULAÇÃO DO EQUIPAMENTO

CONFORME A ALIMENTAÇÃO DA REDE

O seu produto Marantz foi condicionado a satisfazer os requisitos domésticos de energia e segurança existentes na sua zona.

DIREITOS DE AUTOR

Poderá ser necessária autorização para a gravação e a leitura de determinado material. Para mais informações deverá consultar o seguinte:

- Lei do direito de autor de 1956 (Copyright Act)
- Lei dos artistas relacionados com a música e com o teatro de 1958 (Dramatic and Musical Performers Act)
- Leis de protecção dos artistas de 1963 e de 1972 (Performers Protection Acts)
- Quaisquer regulamentos e despachos estatutários posteriores

ADVERTÊNCIAS

- Não exponha o equipamento à chuva nem à humidade.
- Não retire a tampa do equipamento.
- Não atire nada para dentro do equipamento através dos orifícios de ventilação.
- Não manuseie o cabo de alimentação com as mãos molhadas.
- Não cobrir os orifícios de ventilação com objectos tais como toalhas de mesa, jornais, cortinas, etc.
- Não colocar chamas abertas tais como velas acesas, sobre o aparelho.
- Ao deitar foras as pilhas usadas, favor observar os regulamentos governamentais ou as regras com respeito ao meio ambiente que se aplicam no seu país ou área de residência.
- Deixar um espaço completamente livre de cerca de 1 metro acima do painel superior.
- Deixar um espaço de cerca de 0,2 metro ao redor do aparelho.
- Quando o projector for montado no tecto, o Kit de Montagem no Tecto aprovado pela MARANTZ deverá ser utilizado para a instalação.
- Não olhe para dentro da lente quando o projector é activado. Isto pode danificar a visão.
- Desligue o projector da tomada de parede se este não estiver para ser utilizado durante alguns dias.
- Quando o interruptor estiver na posição OFF (desligado), o aparelho NÃO é desligado da rede eléctrica principal.
- A tomada de parede deverá estar instalada perto do equipamento e deverá estar facilmente acessível.
- Não colocar recipientes com água, tal como vasos, sobre o aparelho.

Precauções para o manuseio da lâmpada

CUIDADO

Esta lâmpada SHP é uma lâmpada feita de vidro que contém vapor de mercúrio a alta pressão. A lâmpada pode quebrar ou não acender caso seja manuseada incorrectamente durante a substituição ou devido à temperatura ambiente onde se encontra o projector.

A vida útil da lâmpada também varia conforme a lâmpada, com casos de quebra ou falha em acender na primeira vez que a lâmpada é utilizada. Se a lâmpada quebrar, estilhaços de vidro podem cair dentro do compartimento da lâmpada e do projector, e o gás de dentro da lâmpada que contém vapor de mercúrio poderá ser emitido através da saída do projector.

Antes de o utilizar, leia cuidadosamente o guia do utilizador do projector bem como as instruções para substituição da lâmpada. Lembre-se de manusear a lâmpada com cuidado. No caso de problemas, entre em contacto com o representante autorizado da Marantz.

- Não olhar directamente na lâmpada acesa sem protecção ocular. A luz forte pode causar irritação nos olhos ou prejudicar a visão.
- Não expor a pele directamente à luz da lâmpada. Exposição directa pode causar inflamação na pele.
- Não derrubar, bater, nem usar força excessiva, pois pode danificar a lâmpada.
- Devido ao risco de queimaduras e choque eléctrico ao substituir a lâmpada, desligue a alimentação, desligue o cabo de alimentação da tomada de CA e espere pelo menos 60 minutos para arrefecer antes de substituir a lâmpada.
- Se a lâmpada quebrar, desligue o cabo de alimentação de CA da tomada e entre em contacto com o representante autorizado da Marantz para que faça a substituição. Não tente fazer a substituição nem limpar os estilhaços de vidro de dentro do projector, pois pode resultar em cortes e queimaduras ou ainda danos ao projector.
- Se o projector estiver instalado no teto ou qualquer lugar alto, é extremamente perigoso substituir a lâmpada. Nesse caso, não tente fazer a substituição nem manusear o lâmpada danificada.

AVISO

- A probabilidade da lâmpada quebrar aumenta depois de um longo período de utilização. É recomendável substituir a lâmpada quando a vida útil da mesma estiver próxima do fim. Não utilizar a lâmpada além do tempo máximo determinado.
- Utilizar apenas lâmpadas genuínas Marantz. Confirme que o código do modelo da lâmpada corresponde com o listado no guia do utilizador.
- Antes de substituir a lâmpada, leia cuidadosamente a secção “Substituição da lâmpada” no guia do utilizador. Substitua a lâmpada de acordo com as instruções dadas.
- Para jogar uma lâmpada usada, solicite os serviços de uma companhia autorizada a colectar lixo industrial ou devolva a lâmpada na loja onde a adquiriu. Não quebrar a lâmpada nem jogá-la com o lixo comum.
- Se a lâmpada quebrar, saia da sala imediatamente, ventile o ambiente para evitar inalar o vapor de mercúrio e não retorne por pelo menos 30 minutos.
- Se inalar o vapor de mercúrio, consulte um médico imediatamente e siga as suas instruções.

DEUTSCH

VORWORT

Dieser Abschnitt muß gelesen werden, bevor das Gerät an eine Netzsteckdose angeschlossen wird.

GARANTIE

Bei Garantiefragen wenden Sie sich bitte an Ihren Marantz-Händler.

HEBEN SIE IHRE QUITTING GUT AUF

Die Quittung dient Ihnen als bleibende Unterlage für Ihren wertvollen Einkauf. Das Aufbewahren der Quittung ist wichtig, da die darin enthaltenen Angaben für Versicherungszwecke oder bei Korrespondenz mit Marantz angeführt werden müssen.

WICHTIG!

Bei Garantiefragen muß der Kunde eine Kaufunterlage mit Kaufdatum vorlegen. Ihre Quittung oder Rechnung ist als Unterlage ausreichend.

NETZSPANNUNGS-EINSTELLUNG DES

GERÄTES

Dieses Marantz-Produkt entspricht den Netzspannungs- und Sicherheitsanforderungen, die im Vertriebsgebiet gelten.

VP-12S4 kann nur mit einer Spannung von 230 V AC betrieben werden.

COPYRIGHT

Für die Aufnahme und Wiedergabe von gewissen Materialien kann eine Genehmigung erforderlich sein. Die folgenden Vorschriften müssen beachtet werden:

- Copyright Act 1956
- Dramatic and Musical Performers Act 1958
- Performers Protection Acts 1963 and 1972
- Jegliche nachfolgenden Gesetze und Vorschriften

WARNHINWEISE

- Das Gerät nicht Regen oder Feuchtigkeit aussetzen.
- Die Abdeckung nicht vom Gerät abnehmen.
- Keine Gegenstände durch die Belüftungsschlitze stecken.
- Das Netzkabel nicht mit feuchten oder nassen Händen anfassen.
- Decken Sie die Lüftungsöffnungen nicht mit einem Tischtuch, einer Zeitung, einem Vorhang usw. ab.
- Es dürfen keine Gegenstände mit offener Flamme, wie etwa brennende Kerzen, auf dem Gerät aufgestellt werden.
- Beachten Sie bei der Entsorgung der verbrauchten Batterien alle geltenden lokalen und überregionalen Regelungen.
- Darauf achten, daß über dem Gerät ein Freiraum von mindestens 1 meter vorhanden ist.
- Auf allen Geräteseiten muß ein Zwischenraum von ungefähr 0,2 meter vorhanden sein.
- Wenn der Projektor an der Decke montiert werden soll, muß der von MARANTZ vorgesehene Einbauteilesatz für die Deckenmontage verwendet werden.
- Bei eingeschaltetem Projektor nicht in das Objektiv schauen. Bei Nichtbeachtung können Augenschäden die Folge sein.
- Wenn der Projektor mehrere Tage nicht verwendet werden soll, ist der Stecker aus der Wandsteckdose herauszuziehen.
- Wenn sich der Schalter in der OFF-Position befindet, ist das Gerät NICHT vom Stromnetz getrennt.
- Die Steckdose muß sich in der Nähe des Geräts befinden und leicht zugänglich sein.
- Auf das Gerät dürfen keine mit Flüssigkeiten gefüllte Behälter, wie etwa eine Vase, gestellt werden.

Sicherheitsvorkehrungen zum Umgang mit der Lampe

GEFAHR

Dieser Projektor verwendet SHP-Lampe, eine Hochspannungsglaslampe mit Quecksilberdampf. Die Lampe kann zerbrechen oder unter Umständen nicht leuchten, falls Sie sie beim Austauschen falsch handhaben oder infolge der Umgebungstemperatur des Projektors. Die Lampenlebensdauer variiert je nach Lampe, wobei einige Lampen möglicherweise gleich bei der ersten Verwendung zerbrechen oder nicht leuchten. Falls eine Lampe zerbricht, können die Scherben in der Lampeneinheit und im Projektor verstreut werden; außerdem kann das durch das Zerbrechen der Lampe freigesetzte Gas, das Quecksilberdampf enthält, durch die Entlüftungsöffnungen des Projektors ausströmen. Lesen Sie die Bedienungsanleitung des Projektors und die Anleitungen zum Austauschen der Lampe vor der ersten Inbetriebnahme aufmerksam durch. Bedenken Sie bitte, dass sorgfältige Handhabung gefragt ist. Sollten ernste Probleme auftreten, wenden Sie sich bitte an einen autorisierten Marantz-Fachhändler.

- Sehen Sie nicht mit den bloßen Augen direkt in die leuchtende Lampe. Das helle Licht der Lampe kann zu schmerzenden Augen führen und die Sehkraft beeinträchtigen.
- Achten Sie darauf, dass das Licht der Lampe nicht direkt auf Ihre Haut trifft. Trifft das Licht direkt auf Ihre Haut, kann sich diese entzünden.
- Lassen Sie die Lampe nicht fallen, stoßen Sie sie nicht an, setzen Sie sie keine allzu großen Kräfte an, und beschädigen Sie sie auch sonst nicht.
- Beim Austauschen der Lampe besteht die Gefahr von Verbrennungen und Stromschlag. Schalten Sie den Projektor daher aus, ziehen Sie das Netzkabel aus der Steckdose und warten Sie mindestens 60 Minuten, damit sich die Lampe auskühlt, bevor Sie sie austauschen.
- Falls die Lampe zerbricht, ziehen Sie das Netzkabel aus der Steckdose und wenden Sie sich an einen autorisierten Marantz-Fachhändler, um die Lampe austauschen zu lassen. Versuchen Sie nicht selbst, die Lampe auszutauschen bzw. das zerbrochene Glas aus dem Projektor zu entfernen, da Sie sich dabei schneiden oder verbrennen bzw. das Projektorinnere beschädigen könnten.
- Falls der Projektor an eine Decke gehängt oder an einem hoch gelegenen Ort installiert wird, ist das Austauschen der Lampe besonders gefährlich. Versuchen Sie in diesem Fall nie, die beschädigte Lampe selbst auszutauschen oder zu handhaben.

VORSICHT

- Nach langem Gebrauch ist die Gefahr, dass die Lampe zerbricht, groß. Wir empfehlen, die Lampe gegen Ende ihrer festgelegten Lebensdauer auszutauschen. Verwenden Sie die Lampe nicht nach ihrer maximalen Beleuchtungslebensdauer.
- Verwenden Sie nur die originellen Marantz-Lampeneinheiten. Überprüfen Sie, ob der Modellcode der Lampeneinheit mit dem in der Bedienungsanleitung angeführten Code übereinstimmt.
- Lesen Sie vor dem Austauschen der Lampe den Abschnitt "Austauschen der Lampeneinheit" aufmerksam durch. Tauschen Sie die Lampe so aus, wie es in diesem Abschnitt beschrieben ist.
- Entsorgen Sie die Lampe gemäß den geltenden Umweltschutzregelungen bzw. bringen Sie sie in das Geschäft zurück, in dem Sie sie erworben haben. Zerbrechen Sie die Lampe nicht, um sie mit dem normalen Hausmüll zu entsorgen.
- Sollte die Lampe zerbrechen, verlassen Sie den Arbeitsbereich unverzüglich und bleiben Sie mindestens 30 Minuten von diesem Ort fern. Entlüften Sie den Raum gut, um den Quecksilberdampf nicht einzuatmen.
- Sollten Sie versehentlich Quecksilberdampf einatmen, suchen Sie unverzüglich einen Arzt auf und befolgen Sie seine Anweisungen.

INTRODUZIONE

Leggete questa sezione prima di effettuare qualsiasi collegamento con la rete.

GARANZIA

L'apparecchio è coperto da una garanzia di buon funzionamento della durata di un anno, o del periodo previsto dalla legge, a partire dalla data di acquisto comprovata da un documento attestante il nominativo del Rivenditore e la data di vendita. La garanzia sarà prestata con la sostituzione o la riparazione gratuita delle parti difettose.

Non sono coperti da garanzia difetti derivanti da uso improprio, errata installazione, manutenzione effettuata da personale non autorizzato o, comunque, da circostanze che non possano riferirsi a difetti di funzionamento dell'apparecchio. Sono inoltre esclusi dalla garanzia gli interventi inerenti l'installazione e l'allacciamento agli impianti di alimentazione.

Gli apparecchi verranno riparati presso i nostri Centri di Assistenza Autorizzati. Le spese ed i rischi di trasporto sono a carico del cliente.

La casa costruttrice declina ogni responsabilità per danni diretti o indiretti provocati dalla inosservanza delle prescrizioni di installazione, uso e manutenzione dettagliate nel presente manuale o per guasti dovuti ad uso continuato a fini professionali.

REGOLAZIONE DELLA TENSIONE DI

FUNZIONAMENTO DELL'APPARECCHIO

Il vostro apparecchio Marantz è stato predisposto per l'adattamento alla tensione ed alle norme di sicurezza esistenti nella vostra zona.

VP-12S4 può essere alimentato soltanto da corrente alternata a 230 V.

DIRITTI D'AUTORE

La registrazione e la riproduzione di certi materiali necessita di un permesso.

AVVERTENZE

- Non esporre l'apparecchio alla pioggia o all'umidità.
- Non rimuovere il coperchio dell'apparecchio.
- Non introdurre oggetti all'interno dell'apparecchio attraverso i fori di ventilazione.
- Non toccare il cavo di alimentazione con le mani bagnate.
- Non coprire le fessure di ventilazione con tovaglie, giornali, tende od oggetti analoghi.
- Non posare sull'apparecchio sorgenti di fiamme scoperte quali candele accese.
- Smaltire le pile usate in conformità alle norme governative o disposizioni ambientali vigenti nel proprio paese o zona.
- Non posare nulla per circa un metro sopra il pannello superiore.
- Lasciare 0,2 metro liberi tutto intorno l'unità.
- Se il proiettore viene montato sul soffitto, si deve usare per l'installazione il Corredo di installazione sul soffitto della MARANTZ.
- Non guardare nel proiettore quando questo è acceso. Ciò può danneggiarvi la vista.
- Se si prevede di non doverlo usare per qualche tempo, scollegare il proiettore dalla presa di corrente.
- Se l'interruttore di alimentazione di trova nella posizione OFF, l'apparecchio NON è scollegato del tutto dalla presa di alimentazione.
- La presa di corrente usata deve essere vicina all'apparecchio e facile da raggiungere.
- Non mettere sull'apparecchiatura alcun contenitore di liquido, come ad esempio dei vasi.

Precauzioni d'uso della lampada

PERICOLO

Questa è una lampada SHP di vetro a vapori di mercurio ad alta tensione. Potrebbe rompersi o guastarsi se non viene maneggiata correttamente durante la sostituzione o se il proiettore è soggetto a una temperatura eccessiva.

La durata delle lampade è variabile ed alcune potrebbero addirittura rompersi o non accendersi la prima volta che vengono utilizzate. Se la lampada si rompe, le schegge di vetro potrebbero venire sparse all'interno dell'unità lampada e del proiettore e il gas all'interno della lampada, che contiene vapori di mercurio, potrebbe essere espulso dalle aperture di ventilazione del proiettore.

Prima dell'uso, leggere con attenzione la guida d'uso del proiettore e le istruzioni di sostituzione della lampada. Maneggiare sempre la lampada con attenzione. Nel caso di guasti gravi, rivolgersi al rivenditore autorizzato Marantz.

- Non guardare direttamente verso la lampada accesa a occhio nudo. La luce intensa può abbagliare e danneggiare la vista.
- Non esporre direttamente la pelle alla luce della lampada. L'esposizioni diretta potrebbe irritare la pelle.
- Non far cadere, urtare o sottoporre a forza eccessiva, altrimenti si guasta la lampada.
- La sostituzione della lampada comporta il rischio di bruciature e scosse elettriche, perciò prima di sostituirla, spegnere l'alimentazione, scollegare il cavo di alimentazione c.a. dalla corrispondente presa e attendere almeno 60 minuti che la lampada si raffreddi.
- Se la lampada si rompe, scollegare il cavo di alimentazione c.a. dalla corrispondente presa e chiamare il rivenditore autorizzato Marantz affinché la sostituisca. Non sostituirla personalmente, né raccogliere le schegge di vetro nel proiettore per non subire tagli o bruciature e non danneggiare l'interno del proiettore.
- Se il proiettore è appeso al soffitto o installato in una posizione elevata, è molto pericoloso sostituire la lampada. In questo caso, non sostituire o maneggiare la lampada guasta personalmente.

ATTENZIONE

- La probabilità che la lampada si rompa è elevata dopo che è stata usata per molto tempo. Si consiglia di sostituire la lampada quando si avvicina al termine della vita utile. Non usare la lampada oltre il limite della vita utile.
- Usare unicamente lampade Marantz originali. Verificare che il codice del modello dell'unità lampada corrisponda a quello indicato nella guida dell'utente.
- Prima di sostituire la lampada, leggere con attenzione "Sostituzione dell'unità lampada" nella guida per l'utente. Sostituire la lampada come indicato in tali istruzioni.
- Incaricare dello smaltimento della lampada usata un apposito servizio di smaltimento di rifiuti industriali oppure restituirla al rivenditore. Non rompere la lampada o gettarla con i rifiuti normali.
- Se la lampada si rompe, lasciare il locale immediatamente e non farvi ritorno per almeno 30 minuti; arieggiare il locale in modo da non inalare i vapori di mercurio.
- Se vengono inalati i vapori di mercurio, rivolgersi immediatamente a un medico e seguirne le istruzioni.

IMPORTANT SAFEGUARDS

Caution Concerning the Lamp Replacement

There is potential glass particle hazard if the lamp ruptures.

Caution Concerning the Lamp Unit

There is a potential hazard of glass particle if the lamp ruptures. In case of lamp rupture, contact your nearest Marantz Authorized Dealer or Service Center for a replacement. See "Replacing Lamp Unit". (P.28)

For USA

WARNING
THIS COVER IS PROVIDED WITH INTERLOCK TO REDUCE THE RISK OF EXCESSIVE ULTRAVIOLET RADIATION. DO NOT DEFEAT ITS PURPOSE OR ATTEMPT TO SERVICE WITHOUT REMOVING COVER COMPLETELY.

For Europe

CAUTION HOT
UNPLUG THE POWER CORD AND WAIT 60 MINUTES BEFORE CHANGING THE LAMP.

ATTENTION CHAUD
DEBRANCER LE CORD ON D'ALIMENTION ET ATENDER 60 MINUTES AVANT DE CHANGER LAMPE.

WARNUNG HEISS
ZIEHEN SIE DEN NETZSTECKER AB UND WARTEN SIE 60 MINUTEN, BEVOR SIE DIE GLUHLAMPE WECHSELN.

For USA

CAUTION : HIGH PRESSURE LAMP MAY EXPLODED IF IMPROPERLY HANDLED. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.	CAUTION HOT : UNPLUG THE POWER CORD AND WAIT 60 MINUTES BEFORE CHARGING THE LAMP.
ATTENTION : LA LAMPE SOUS HAUTE PRESSION PEUT SI ELLE, N'EST PAS MANIPULEE CORRECTEMENT, CONFIER L'OPERATION A UN PERSONNEL D'ENTRETIEN QUALIFIE.	ATTENTION CHAUD : DEBRANCER LE CORD ON D'ALIMENTION ET ATENDER 60 MINUTES AVANT DE CHANGER LAMPE.

For Europe

CAUTION HIGH PRESSURE LAMP MAY EXPLODED IF IMPROPERLY HANDLED. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.	VORSICHT : BEI FALSCHER HANDHABUNG KANN DIE HOCHDRUCKLAMPE EXPLODIEREN UBERLASSEN SIE WARTUNGSARBEITEN NUR FACHPERSONAL.
ATTENTION LA LAMPE SOUS HAUTE PRESSION PEUT EXPLOSER SI ELLE, N'EST PAS MANIPULEE CORRECTEMENT, CONFIER L'OPERATION A UN PERSONNEL D'ENTRETIEN QUALIFIE.	

Caution Concerning the Setup of the Projector

For minimal servicing and to maintain high image quality, avoid humidity, dust and cigarette smoke. When the projector is subjected to these environments, the lens and part of ventilation holes must be cleaned more often than usual. As long as the projector is properly maintained in this manner, use in these environments will not reduce the overall operation life. Please note that all internal cleaning must be performed by an Marantz Authorized Dealer, or Service Center.

- Do not expose the projector to extreme heat or cold.
- Operating temperature: 41 °F to 95 °F (+5 °C to 35 °C)
- Storage temperature: -4 °F to 140 °F (-20 °C to +60 °C)

Notes on Operation

- The exhaust ventilative hole, the lamp cage cover and adjacent areas may get extremely hot during projector operation. To prevent injury, do not touch these areas until they have sufficiently cooled down.
- Allow at least 1 foot (30 cm) of space between the exhaust ventilative hole and the nearest wall or obstruction.
- If the cooling fan becomes obstructed, a protection device will automatically turn off the projector lamp. This does not indicate a malfunction. Remove the projector power cord from the wall outlet and wait at least 10 minutes. Then turn on the power by plugging the power cord back in. This will return the projector to the normal operating condition.

FEATURES

- Incorporates the latest DLP® chip -- “1080p DLP®” (1920 x 1080 pixel, 16:9 wide panel). Using an optimized system for movie viewing with specially designed image circuits and optical parts, the VP-11S1 bring high color reproduction with the pitch black of movie films that reproduces images in rich tones and crisp black.
 - Images are sharply detailed, smooth and high quality owing to a powerful chip that builds into a dedicated processor an image processing IC featuring Gennum’s proud “VXP™” high quality contouring technology, “TruMotionHD™”, “FineEdge™”, “RealityExpansion™” and “FidelityEngine™”.
 - Konica Minolta optical system custom-made for Marantz.
 - A large 98mm 7-segment color wheel that builds an ND filter.
 - 4 Picture Modes (Theater, Standard, Dynamic, User)
 - 5 built-in preset gammas
 - Fine-adjustment menus that allow the user to adjust images as they like
 - 18 user menus for saving adjusted images
 - Color temperature setting (5250K, 5800K, 6500K, 7500K, 9300K)
 - Black level adjustment
 - Supports input of NTSC, PAL, SECAM and satellite broadcasts (480i/p, 540p, 576i/p, 720p, 1035i, 1080i/p).
 - Rich array of input jacks including HDCP supporting HDMI digital input jack and dual system component jacks
 - 1.45x zoom lens
 - Lens shift feature for vertically positioning the projection point
 - Digital correction of vertical keystone distortion
 - Projection modes for functional, hanging and rear projection
 - Remote controller with all back-lit keys
 - Light-up I/O jacks for easy connections and setup in dark environments
 - Equipped with RS-232C port and 12V trigger terminal for custom installation
 - Marantz system bus port
 - Low operating noise thanks to a die-cast silent duct, hermetically sealed color wheel motor and fan speed control
 - Highly rigid die-cast chassis to minimize radiating noise
 - 2000 hr long-life 200W SHP lamp with double-shielded safety structure
- **Digital Light Processing, DLP, DLP logo** and **DLP Medallion logo** are registered trademarks of Texas Instruments.
 - **VXP, Visual Excellence Processing** and the **VXP Logo** are trademarks or registered trademarks of Gennum Corporation.
 - All trademarked product names mentioned in this manual are the property of their respective companies.
 - **HDMI**, the **HDMI logo** and **High-Definition Multimedia Interface** are trademarks or registered trademarks of HDMI Licensing LLC.

ACCESSORIES

- Lens Cap x 1

- Remote Controller x 1

- AAA Size Batteries x 2

- AC Power Code

For USA

For Europe

- Bus Control Adapter Cable (Mini Jack to RCA) x 1

- User Guide x 1

- Warranty Card
(1 copy each for USA, CANADA)
Comes with USA model only.

PROJECTOR LAYOUT AND FUNCTIONAL OVERVIEW

Front and Top View

1 Focus ring (P.11)

Adjust the picture focus.

2 Zoom ring (P.11)

Adjust the size of the projected image.

3 Lens Shift knob (P.12)

Manually adjust the position of the image vertically.

4 Power / I button (P.16)

Press to turn the projector ON or STANDBY mode.

5 MENU button (P.19)

Display the on-screen menu.

6 ENTER button

Press to enter the selected menu item.

7 INPUT SELECT button (P.16)

Selects the input signal (COMPONENT 1, COMPONENT 2, S-VIDEO, VIDEO, RGB, HDMI 1 and HDMI 2).

8 PATTERN button (P.11)

Projects a focus pattern on the screen.

9 The ▲ / ▼ / ◀ / ▶ buttons

Control the MENU cursor.

10 ON indicator

Lights up blue when power is ON. When power is shut OFF, the lamp flashes for about 1 minute before going out.

11 STANDBY indicator

Lights up green when the projector is on standby.

12 WARNING/LAMP indicator

Flashes or lights up when something is wrong with the lamp cover, lamp, fan, or temperature inside the projector.

For more information on the error mode, see the "Error Mode List" (P.32)

13 Ventilation holes (intake)

14 Ventilation holes (exhaust)

Notes:

- Do not place anything near the ventilation holes to avoid overheat inside the unit.
- Do not place your hand or objects near the ventilation holes; the air is coming out.

Note: Pixel defects

DLP® chip is one of the most advanced technologies for consumer products. The DLP® chip made by high precision technology, however some pixel defects may be found on the projected image. We are trying our best to control the quality in order to reduce the number of defective pixels. It is almost impossible to have zero pixel defects, even using the most advanced technology. This is not a problem only for Marantz, but all DLP® projector manufactures. Therefore we have to note that the warranty does not cover the DLP® chip for pixel defects. We appreciate your understandings.

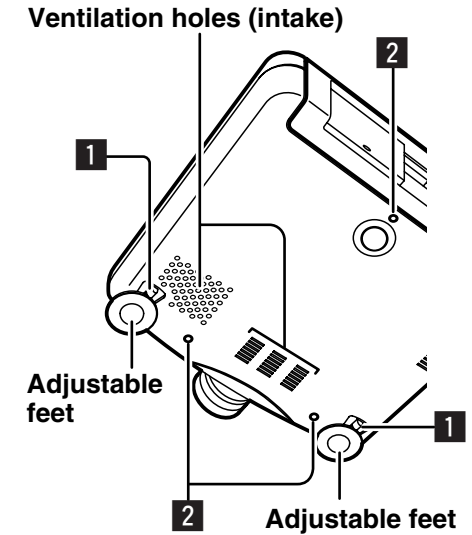

Note: Lamp

SHP lamp is one of the most advanced technologies for consumer products. The lamp made by high precision technology, however some lamps might be failing before it reaches its life. And projector's brightness is getting darker along with accumulated lamp usage hours. We are trying our best to control the quality in order to reduce lamp failures. It is almost impossible to have zero failure, even using the most advanced technology. This is not a problem only for Marantz, but all projector manufactures. Therefore we have to note that the warranty does not cover the SHP lamp for lamp failures: explosion, and non-lighting except initial use. And also we have to note that the warranty does not cover the SHP lamp for lamp failures: flickering, and getting darker along with accumulated lamp usage hours. We appreciate your understandings.

Rear and Terminals View

Bottom View

1 AC IN (P.9)

Connect the supplied AC power code.

2 RGB IN

Connect the analog RGB output from an IBM VGA or compatible equipment.

3 COMPONENT VIDEO IN 1 and 2

Terminals 1 and 2 have each Y, Pb/Cb, Pr/Cr terminals. Connect them to the component video output of a video device, AV amp/processor, DVD player, etc.

4 S-VIDEO IN

Connect the S-VIDEO output from a video equipment.

5 VIDEO IN

Connect the composite video output from a video equipment.

6 TRIG.1(TRIGGER 1)

When the unit is turned on, 12V is output. When the unit is turned off, no voltage is output. This allows such as a powered up/down screen, whenever the projector is turned on or off.

Note:

- Do not use TRIG.1 and TRIG.2, as the power source.
- To connect with external devices, use an ordinal 3.5mm mini-plug (mono) cable.

7 REMOTE IN/OUT

By connecting this projector to another Marantz audio component using a supplied System Control cable, you can remotely operate the components as a single system.

- When connecting to component with a remote sensor (such as the SR9500, SR8500), be sure to connect the "REMOTE CONTROL IN" jack of this projector to the "REMOTE CONTROL OUT" jack of the component with the remote sensor.

Note:

For connections, always use the included bus control adaptor cable.

8 TRIG.2(TRIGGER 2)

Select ON or OFF at each aspect mode, such as Full, Normal, Zoom, V-Stretch and Through to control screen aspect ratio with powered up/down dual aspect ratio screen.

Notes:

- Do not use TRIG.1 and TRIG.2, as the power source.
- To connect with external devices, use an ordinal 3.5mm mini-plug (mono) cable.

9 HDMI IN 1 and 2

Connect the digital signal (TMDS compliant, single link only)

Note:

To use the HDMI terminal, please follow the cautions on page 10.

10 LIGHT ON/OFF

Select ON : The terminal panel lights up.

11 RS-232C

This is the control port for the custom installer.

1 Adjustment lever (P.12)

Lift the projector and turn the adjustment lever right or left. The adjustable feet will extend from the projector. Then, release the lever, the adjustable feet is locked.

2 Screw holes for ceiling mount kit

Remote Controller

(1) **STANDBY button** (P.18)

Turn the projector off.

(2) **IRIS button**

Switches lens aperture between F6.0 and F3.0.

(3) **LAMP button**

Switches the lamp between the normal and energy-saving modes.

(4) **C.TEMP button**

Sets color temperature to 1, 2, 3, 4, 5 or HB.

(5) **GAMMA button**

Sets the gamma curve to Theater, Standard, Dynamic, A, B, C, D or E, when the picture mode is set to User.

(6) **COMP. 1 (Component video in 1) button** (P.16)

Selects the device connected to the COMPONENT VIDEO IN 1 jack as the input source.

(7) **COMP. 2 (Component video in 2) button** (P.16)

Selects the device connected to the COMPONENT VIDEO IN 2 jack as the input source.

(8) **S-VIDEO button** (P.16)

Select the S-VIDEO IN signal.

(9) **HDMI 1 button** (P.16)

Select the HDMI 1 IN signal.

(10) **HDMI 2 button** (P.16)

Select the HDMI 2 IN signal.

(11) **VIDEO button** (P.16)

Select the VIDEO IN signal.

(12) **A1 button**

This button does not work with this projector.

(13) **A2 button**

This button does not work with this projector.

(14) **RGB button** (P.16)

Select the RGB IN signal.

(15) **THEATER (THTR) button** (P.22)

Select the Theater picture mode.

Theater mode is designed for high fidelity black appearance and is good for movie pictures.

Every time THTR button is pressed, the selection rotates in the order of Theater 1 → Theater 2 → Theater 3 → Default.

(16) **STANDARD (STD) button** (P.22)

Select the STANDARD picture mode.

Standard mode is good for normal pictures.

Every time the button is pressed, the selection rotates in the order of Standard 1 → Standard 2 → Standard 3 → Default.

(17) **DYNAMIC (DYN) button** (P.22)

Select the Dynamic picture mode.

Dynamic mode is good for visually dynamic pictures.

Every time the button is pressed, the selection rotates in the order of Dynamic 1 → Dynamic 2 → Dynamic 3 → Default.

(18) **B1 button** (P.26)

Selects Blanking Memory 1.

(19) **B2 button** (P.26)

Selects Blanking Memory 2.

(20) **B3 button** (P.26)

Selects Blanking Memory 3.

(21) **OFF button** (P.26)

Turns the blanking mode off.

(22) **V-MUTE button**

Turn the picture into black. Press again to resume.

(23) **▲ / ▼ / ◀ / ▶ / ENTER buttons**

Press the cursor buttons (▲ [UP], ▼ [DOWN], ◀ [LEFT], ▶ [RIGHT]) to select menu items. Press the ENTER button to enter the selected menu item.

(24) **ASPECT (Aspect select) button** (P.16)

Selects the aspect ratio. Every time the button is pressed, the selection rotates in the order of Full → Normal → Zoom → V-Stretch → Through.

(25) **VCR MODE button** (P.24)

Turns the VCR mode on and off.

(26) **CINEMA button** (P.24)

Turns the 2-3 pull down mode on and off.

(27) **FULL button** (P.16)

Sets aspect ratio to full mode.

(28) **NORMAL button** (P.16)

Sets aspect ratio to normal mode.

(29) **ON button** (P.16)

Turn the projector on.

(30) **USER G1 button** (P.22)

Selects the user mode.

The user mode is for enjoying images at a user-selected gamma curve.

Every time the button is pressed, the selection rotates in the order of User 1 → User 2 → User 3. For more information on how to select gamma curve. (P.23)

(31) **USER G2 button** (P.22)

Selects the user mode.

The user mode is for enjoying images at a user-selected gamma curve.

Every time the button is pressed, the selection rotates in the order of User 4 → User 5 → User 6. For more information on how to select gamma curve. (P.23)

(32) **USER G3 button** (P.22)

Selects the user mode.

The user mode is for enjoying images at a user-selected gamma curve.

Every time the button is pressed, the selection rotates in the order of User 7 → User 8 → User 9. For more information on how to select gamma curve. (P.23)

(33) **USER G4 button**

This button does not work with this projector.

(34) **LIGHT button**

Lights all buttons for about 10 sec.

(35) **MENU button** (P.19)

Display the on-screen menu.

If pressed again, the on-screen menu disappears.

(36) **INFO. button** (P.28)

Turn the information menu on or off.

(37) **INPUT (Input signal select) button** (P.16)

Selects the input signal. Every time the ▲/▼ buttons are pressed, the input signal rotates in the order of COMPONENT 1 ↔ COMPONENT 2 ↔ S-VIDEO ↔ VIDEO ↔ RGB ↔ HDMI 1 ↔ HDMI 2.

(38) **BLACK LEVEL button** (P.24)

Sets the black level.

During analog signal input0 IRE/7.5 IRE

During HDMI signal input.....Normal/Expand

(39) **PATTERN button** (P.11)

Projects a focus pattern on the screen.

(40) **ZOOM button** (P.16)

Sets aspect ratio to zoom mode.

(41) **THROUGH button** (P.16)

Sets aspect ratio to through mode.

Remote Controller Operational Range

Operate the remote controller within a distance of approximately 5m from the IR sensor (remote sensor) on the projector.

Remote control operation may not be possible if the remote control unit's transmitter is not pointing in the direction of the remote sensor or if there is an obstruction between the transmitter and the remote sensor.

Preparing the Remote Controller

1. Take the cover off the battery case on the remote control backside.

2. Insert two AAA size batteries. Make sure the polarities match the + and - marks inside the battery compartment.

3. Reattach the battery case cover as before.

Notes :

- Do not mix alkaline and manganese batteries.
- Do not mix old and new batteries.

CAUTIONS ON BATTERIES

- Use AAA alkaline batteries in this remote controller.
- If the remote control unit does not operate from close to the main unit, replace the batteries with new ones, even if less than a year has passed.
- The included battery is only for verifying operation. Replace it with a new battery as soon as possible.
- When inserting the batteries, be careful to do so in the proper direction, following the + and - marks in the remote control unit's battery compartment.
- To prevent damage or battery fluid leakage:
 - Do not use a new battery with an old one.
 - Do not use two different types of batteries.
 - Do not short-circuit, disassemble, heat or dispose of batteries in flames.
- Remove the batteries when not planning to use the remote control unit for a long period of time.
- If the batteries should leak, carefully wipe off the fluid from the inside of the battery compartment, then insert new batteries.
- When disposing of used batteries, please comply with governmental regulations or environmental public instruction's rules that apply in your country or area.

CONNECTION

❖ When making connections be sure to:

- Turn off all equipment before making any connections.
- Use the proper cables for each connection.
- Securely insert the plug into the port to connect cables. Loose cables can lead to trouble and damage.

❖ When pulling out a cable:

- Be sure to grab the plug, not the cable itself.

Connection with AC Power Supply

Connect the supplied AC power cord into the AC IN socket of the projector. The STANDBY indicator lights up and the projector goes into the standby mode.

Note : Make sure the AC power cord is firmly connected into the AC IN socket.

Connection with Video Equipments

You can connect this projector to a VCR, DVD player and other video equipment.

Connecting a video source using S-VIDEO IN and VIDEO IN terminals.

1. Connect one of the S-video cable to the S-VIDEO IN terminal, or one end of the video cable to the VIDEO IN terminal on the projector.
2. Connect the other end of the S-video cable or the video cable to the S-video output terminal or video output terminal of the video source.

Connecting a DVD player to the COMPONENT VIDEO IN 1 or 2 terminal (Devices can be connected to both terminals at the same time.)

1. Connect the individual terminals of the component video cable into the COMPONENT VIDEO IN 1 or 2 terminal of the projector.
2. Connect the other end of the cable to the corresponding terminals on a DVD player.

Connection with a HD-Video, DVD Player, Satellite, Cable Tuner or PC

You can connect this projector to HD-Video /PC using RGB IN port, or DVD Plyer /Satellite /Cable Tuner /PC using HDMI IN port.

1. Connect one end of the RGB cable to the RGB IN port, or one end of the HDMI cable to the HDMI IN port on the projector.
2. Connect the other end to the corresponding port on a HD-Video, Satellite, Cable Tuner or personal computer.
3. If using DVI-A or DVI-D output, use respectively a DVI-A-RGB or DVI-D-HDMI conversion cable.

Note : When projecting a video image from a device connected to the HDMI terminal, follow the procedure below.

1. Turn on power of this unit. (P.16)
2. Set the input video source to HDMI input. (P.16)
3. Turn on power of the device connected to the HDMI terminal of the unit (i.e. DVD player).

If the procedure above is not followed, projected image may corrupt.

For the details of the HDMI terminal on the device connected with the unit, see the instruction manual of the device.

Advanced Connection

You can control total home theater system using PC or Marantz receiver equipment. For installing below system, consult with Marantz authorized dealer.

INITIAL SETTING

Turning on the Power

1. Connect the supplied AC power cord. (☞ P.9)
2. Press the **ON** button on the remote controller or the **⏻ / I** button on the projector. The ON indicator lights up.

Zooming and Focusing

- Project an image on the screen roughly at first.
1. Turn the **Zoom ring** and adjust to the desired size within the zoom range.
 WIDE: Enlarges (zooms in) the projected image.
 TELE: Reduces (zooms out) the projected image.
 2. Turn the **Focus ring** until the image on the screen becomes clear.

Detail Focusing

You can strictly focus the image with focus pattern.

1. Press the **PATTERN** button to project the focus pattern on the screen.

2. Turn the **Focus ring** to make an adjustment.
 Adjust the focus for the sharpest image possible to obtain, using focus pattern.

3. Press the **PATTERN** button again to hide the focus pattern. This completes fine focusing.

Note :
Focus Pattern Color by Lens Shift Position (☞ P.15)
 The focus pattern changes color depending on the lens position. There are two colors and they can be used for checking the quality of the projected image. The **white** focus pattern uses the highest optical performance to maximize the sharpness of the projected image. To enjoy the highest sharpness, it is recommended to position the lens within this range.
 When the lens is shifted outside the aforementioned range, the focus pattern turns **green**. Rough focusing in this range loses image sharpness.
 Adjusting the zoom position from WIDE to TELE enhances sharpness even at the same lens position.

Adjusting the Image Position

You can adjust the image position with the Lens Shift knob.

❖ Turn the Lens Shift knob to clockwise : The image goes up.

❖ Turn the Lens Shift knob to counterclockwise : The image goes down.

Adjusting the Height

You can position the projected image by changing the height of the projector's adjusters.

1. Move the adjuster lever to the left or right to enable adjuster changing. Carefully lift the projector.
2. Once having positioned the projector, return the adjuster lever as before to lock in place. Check the adjusters are securely locked before releasing your hands from the projector.
3. Turn the adjuster to fine-adjust the height.

❖ Returning the Projector to its Initial Position

Slightly lift the projector, turn the adjuster lever to the left or right, then carefully set the projector down.

Keystone Correction

When the projecting image is a trapezoid, correct it in Keystone and in the Display Menu. See "Display". (P.26)

When using the keystone feature to correct a trapezoidal image, picture contours can look like staircases because of image correction.

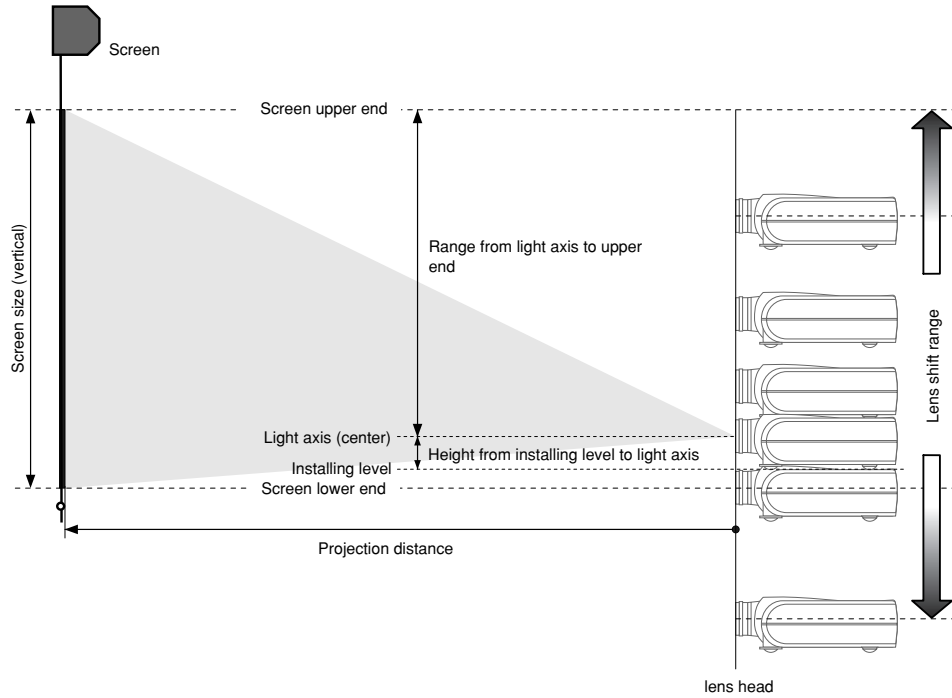

❖ Keystone
(Electronic keystone correction)

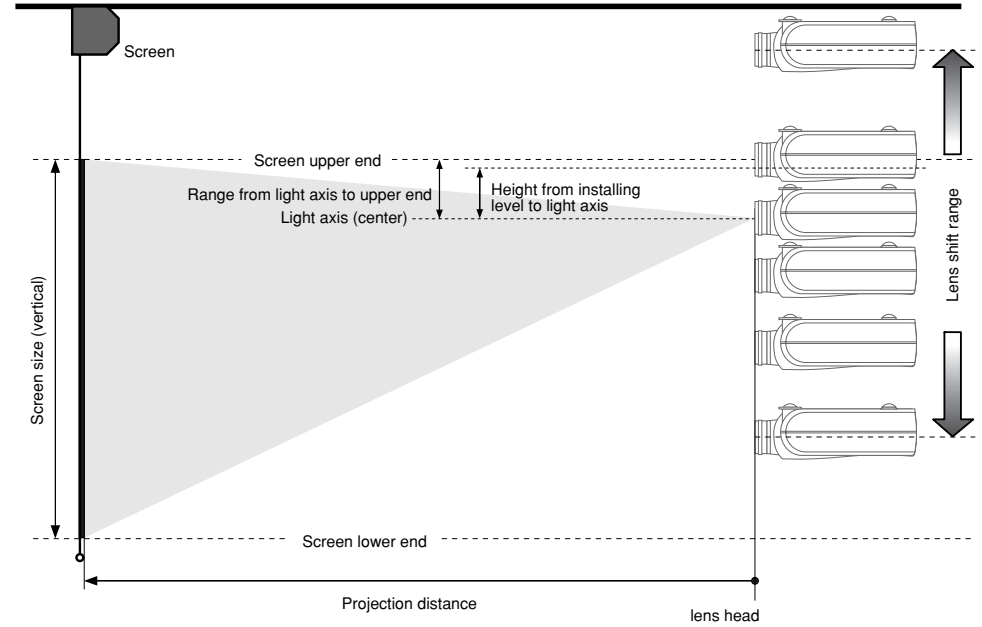

INSTALLATION

Recommended Setting

❖ Installing on a tabletop

❖ Mounting on the ceiling

CAUTION

- For ceiling installation, consult with Marantz authorized dealer.
- Do not look into the lens when the projector is turned on. It could damage your eyesight.

Screen Size and Projection Distance (inch) VP-11S1

❖ 16 : 9 Screen

In case of displaying the 16:9 picture on the whole of the 16:9 screen.

16:9 Screen Size (1.77:1 Aspect Ratio)			Projection Distance	
Diagonal	Width	Height	Minimum	Maximum
inch	inch	inch	inch	inch
70	61	34 5/16	88 6/16	129 1/16
72	62 12/16	35 5/16	90 15/16	132 13/16
80	69 12/16	39 4/16	101 5/16	147 13/16
82	71 8/16	40 3/16	103 14/16	151 9/16

250	200	150	392 14/16	570 6/16

To calculate the installation measurement (unit : inch)
 Minimum = 1 9/16 x Screen Size - 2 2/16
 Maximum = 2 5/16 x Screen Size - 1 15/16
Note : When installing the projector, consider ±5% tolerance for the Projection Distance in the above table.

Screen Size and Projection Distance (mm) VP-11S1

❖ 16 : 9 Screen

In case of displaying the 16:9 picture on the whole of the 16:9 screen.

16:9 Screen Size (1.77:1 Aspect Ratio)			Projection Distance	
Diagonal	Width	Height	Minimum	Maximum
inch	mm	mm	mm	mm
70	1,550	872	2,243	3,276
72	1,594	897	2,308	3,371
80	1,771	996	2,571	3,751
82	1,815	1,021	2,636	3,846
84	1,860	1,046	2,702	3,941
90	1,992	1,121	2,899	4,226
92	2,037	1,146	2,964	4,321
100	2,214	1,245	3,227	4,701
106	2,347	1,320	3,423	4,986
110	2,435	1,370	3,555	5,176
120	2,657	1,494	3,883	5,651
123	2,723	1,532	3,981	5,794
133	2,944	1,656	4,309	6,269
135	2,989	1,681	4,375	6,364
150	3,321	1,868	4,867	7,076
170	3,763	2,117	5,523	8,026
200	4,428	2,491	6,507	9,451
250	5,535	3,113	8,147	11,826

To calculate the installation measurement (unit : mm)
 Minimum = 32.8 x Screen Size - 53.4
 Maximum = 47.5 x Screen Size - 48.8
Note : When installing the projector, consider ±5% tolerance for the Projection Distance in the above table.

❖ 4 : 3 Screen

In case of displaying the 16:9 picture on the whole of the 4:3 screen.

4:3 Screen Size (1.33:1 Aspect Ratio)			Projection Distance	
Diagonal	Width	Height	Minimum	Maximum
inch	mm	mm	mm	mm
70	1,422	1,067	2,754	4,018
72	1,463	1,097	2,834	4,134
80	1,626	1,219	3,155	4,599
82	1,666	1,250	3,235	4,715
84	1,707	1,280	3,315	4,832
90	1,829	1,372	3,556	5,180
92	1,869	1,402	3,636	5,296
100	2,032	1,524	3,957	5,761
106	2,154	1,615	4,197	6,110
110	2,235	1,676	4,358	6,342
120	2,438	1,829	4,759	6,923
123	2,499	1,875	4,879	7,098
133	2,703	2,027	5,280	7,679
135	2,743	2,057	5,360	7,795
150	3,048	2,286	5,962	8,666
170	3,454	2,591	6,764	9,828
200	4,064	3,048	7,967	11,571
250	5,080	3,810	9,972	14,476

To calculate the installation measurement (unit : mm)
 Minimum = 40.1 x Screen Size - 53.4
 Maximum = 58.1 x Screen Size - 48.8
Note : When installing the projector, consider ±5% tolerance for the Projection Distance in the above table.

Lens shift position

❖ **Standard condition (From -85% to +100%)**

❖ **Extended mounting condition (From +100% to +165%)**

CAUTION:
In the expanded mounting condition (green focus pattern), the corners of the picture may appear dark or distorted.

BASIC OPERATIONS

Turning on the Power

Press the **ON** button on the remote controller or the  / **I** button on the projector. The ON indicator lights up.

Selecting the Input Signal Source

Switch to the equipment connected to the projector. Every time the **INPUT** button of the projector or the **INPUT ▲** button of the remote controller is pressed, the input signal rotates in the order of COMPONENT 1 → COMPONENT 2 → S-VIDEO → VIDEO → RGB → HDMI 1 → HDMI 2. When the **INPUT ▼** button of the remote controller is pressed, the input signal rotates in the opposite order. An input signal can also be directly selected by pressing one of the **COMP.1**, **COMP.2**, **S-VIDEO**, **VIDEO**, **RGB**, **HDMI 1** and **HDMI 2** buttons on the remote control.

Selecting the Aspect Mode

You can select 4 kinds of ASPECT mode using remote controller. Pressing the **ASPECT** button on the remote control rotates the aspect ratio in the order of FULL → NORMAL → ZOOM → V-STRETCH → THROUGH, allowing you to select an aspect ratio. An aspect ratio can also be directly selected by pressing one of the **FULL**, **NORMAL**, **ZOOM** or **THROUGH** buttons on the remote controller. A selection can also be made from the menu. (P.23)

The Screen Images in a 16:9 screen

- Press the **ZOOM** button, the **NORMAL** button or the **FULL** button on the remote controller for the 4:3 aspect ratio video source.
- Press the **FULL** button on the remote controller for 16:9 aspect ratio video source, such as 1080i, 1035i, and 720p video systems.
- Press the **FULL** button on the remote controller for the squeezed video source.

❖ Original Source Image

16 : 9 video source

4 : 3 video source

❖ Full mode

The 16:9 squeezed image is displayed with the correct aspect.

The 4:3 image is enlarged horizontally.

❖ Normal mode

The picture in normal ratio 4:3 is displayed.

❖ Zoom mode

The picture in normal ratio 4:3 is enlarged vertically and horizontally (with same ratio) to the screen size

❖ V-Stretch mode

The 2.35:1 image is shown across the entire screen. The vertical component of the aspect ratio is elongated in this case.

❖ Through mode

Images are shown at the same resolution as RGB/video signals.

The Screen Images in a 4:3 screen

- Press the **ZOOM** button, the **NORMAL** button or the **FULL** button on the remote controller for the 4:3 aspect ratio video source.
- Press the **FULL** button on the remote controller for 16:9 aspect ratio video source, such as 1080i, 1035i, and 720p video systems.
- Press the **FULL** button on the remote controller for the squeezed video source.

❖ Original Source Image

16 : 9 video source

4 : 3 video source

❖ Full mode

The 16:9 squeezed image is displayed with the correct aspect.

The 4:3 image is enlarged horizontally.

❖ Normal mode

The picture in normal ratio 4:3 is displayed.

❖ Zoom mode

The picture in normal ratio 4:3 is enlarged vertically and horizontally (with same ratio) to the screen size

❖ V-Stretch mode

The 2.35:1 image is shown across the entire screen.

❖ Through mode

Images are shown at the same resolution as RGB/video signals.

To Turn off the Power

1. Press the **STANDBY** button on the remote controller or the \cup / I button on the projector.
2. The fan continues running for about 1 minute to internally cool the projector. In the meantime, the ON indicator on the projector flashes a blue color and buttons on the projector and remote control are irresponsive to touch. Once the fan stops, the ON indicator goes out and the STANDBY indicator lights up a green color to indicate the projector is on standby.

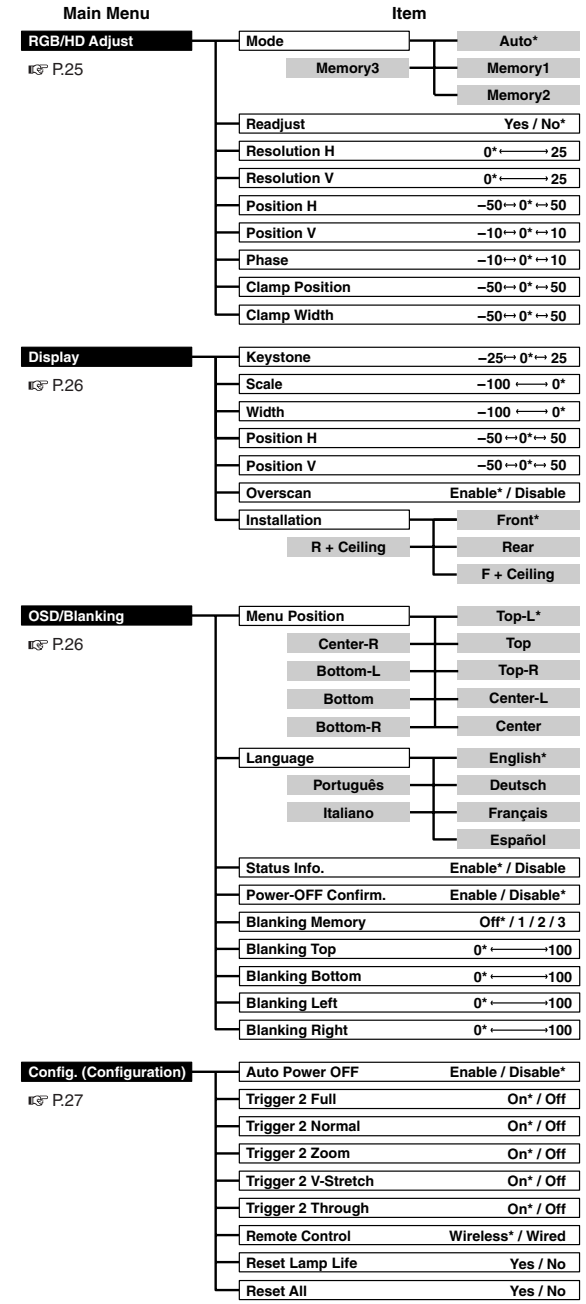

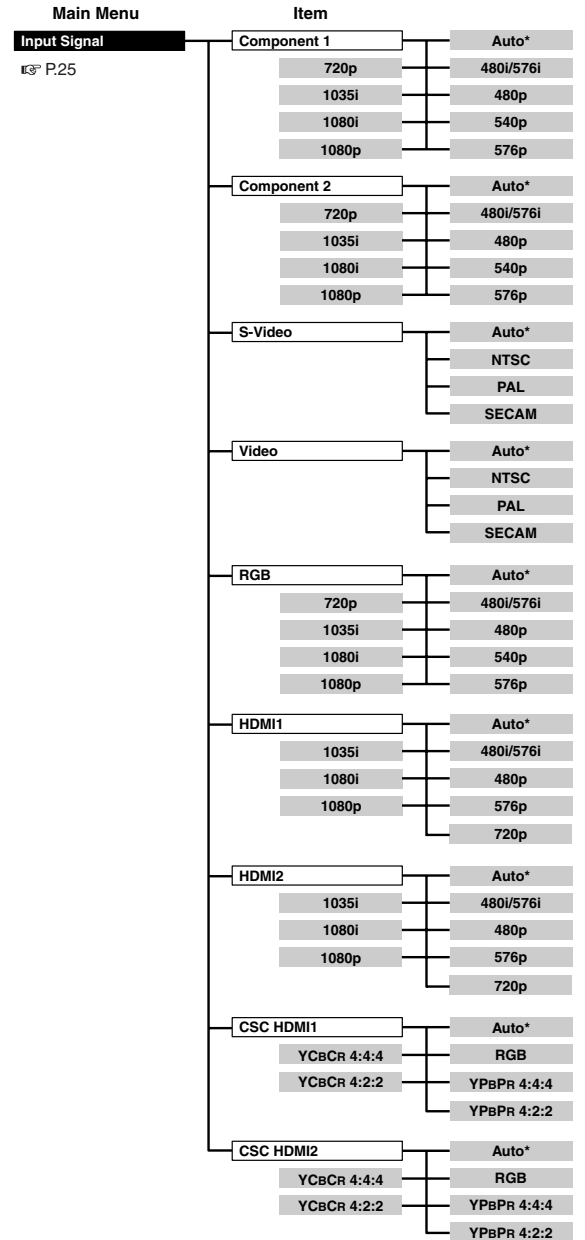

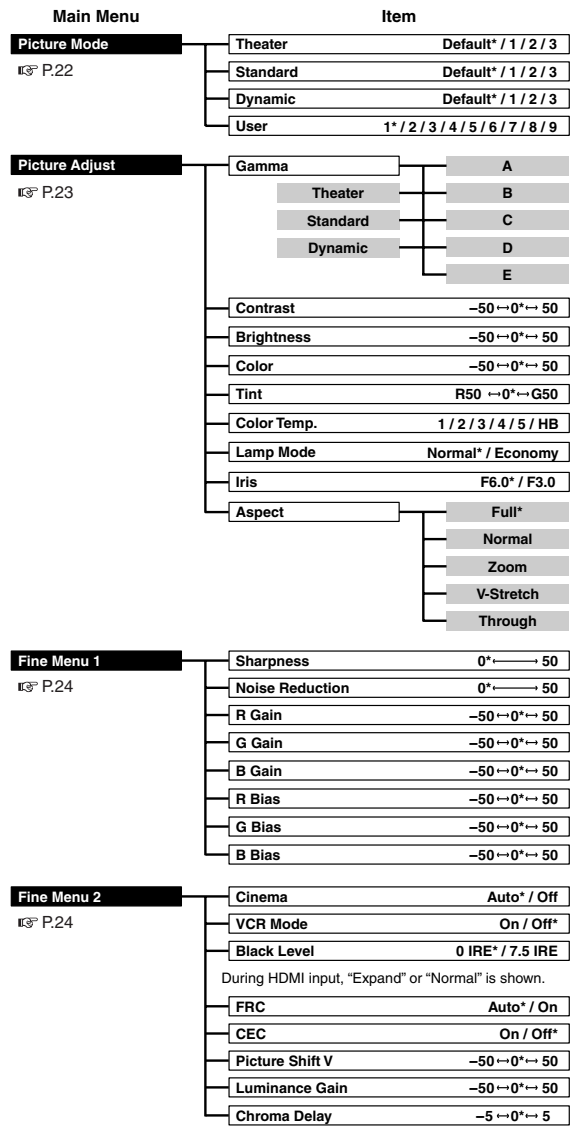

Notes :

- Do not pull out the AC power cord until the projector turns in standby mode.
- Do not pull out the power cord suddenly in the state of "POWER ON." It can cause a breakdown.
- If the WARNING indicator lights up or blinks a yellow color, check that the fan has stopped then unplug the AC power cord from its outlet.
- The projector will not be turned on if the **ON** button on the remote controller or the \cup / I button on the projector is pressed immediately after turning off. Press the **ON** button on the remote controller or \cup / I button on the projector after the projector turns into standby mode.
- When on standby, power to the projector is not OFF completely. If not planning to use the projector for an extended period of time, unplug the AC power cord from AC power outlet as explained above.

*1 Can be selected only when User is selected for the Picture Mode.

*2 On only when interlaced signals are input. (Off for progressive signals.)

*3 On only when 1080i signals are input.

*4 On only when Aspect is set to Zoom or V-Stretch.

*5 On when the RGB/HD Adjust mode is set to Memory.

*6 On when the RGB/HD Adjust mode is set to Memory. However, as an exception, it is off when Aspect is set to Through.

*7 On when 480i/p or 576i/p signals are input.

*8 On when Blanking Memory is selected for OSD/Blanking.

*9 Cannot be selected when the default is selected for Picture Mode.

*10 Off when PC signals (1024 x 768, etc.) are input.

Picture Mode

This unit has four picture modes: Theater, Standard, Dynamic and User. The picture quality recommended by Marantz is already set for each mode. The User mode has eight gamma curves that can be chosen and saved by users. Also, the Theater, Standard and Dynamic modes three indexes for memorizing picture quality adjustments. Similarly, the User mode has nine, making a total of 18 indexes available for use.

Standard 1			
Picture Adjust	Theater	Default	
Fine Menu 1	Standard	1	Default
Fine Menu 2	Dynamic	Default	1
Input Signal	User	1	2
RGB/HD Adjust			3
Display			
OSD/Blanking			
Config.			

Picture mode	Index
Theater	Default, 1, 2, 3
Standard	Default, 1, 2, 3
Dynamic	Default, 1, 2, 3
User	1, 2, 3, 4, 5, 6, 7, 8, 9

- **Theater:** Reproduces the black suited for movie software.
- **Standard:** Suited for normal movie software.
- **Dynamic:** Suited for visually dynamic image software.
- **User 1-9:** Enable the user to adjust the gamma curve as preferred. (P.23).

Picture mode selection

There are two ways to select the Picture mode: selecting a mode from the MENU screen or pressing the picture mode buttons (**THTR**, **STD**, **DYN**) on the remote controller. To use the remote controller buttons to select a picture mode, make sure the MENU screen does not appear on the screen and press the desired picture mode button any number of times. (P.6)

To select an picture mode from the menu, do as follows.

1. Press the **MENU** button. The MENU screen appears on the screen.
2. Use the **▲/▼** buttons to select the Picture Mode displayed at the top of the menu.
3. Press the **ENTER** button to display the picture mode selection screen. Use the **▲, ▼, ►** and **◀** buttons to select an picture mode.
4. Press the **ENTER** button to decide the selected picture mode. Once the mode has been entered, the screen returns to the previous menu.

Memorizing settings in an index

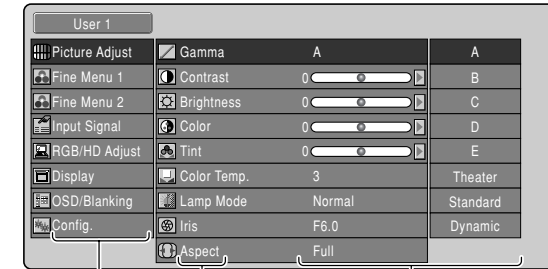

The settings made in "Picture Adjust" and "Fine Menu 1" of the main menu are automatically memorized in the currently selected picture mode. Therefore, first select an picture mode and index, and then make settings.

Note : When default is selected, "Picture Adjust" and "Fine Menu 1" cannot be selected from the menu.

How to Operate Menus

This projector has menus that make setting and adjustment easy.

1. Press the **MENU** button. The MENU screen appears on the screen.

Main menu Menu item Setting or adjustment level

2. Use the **▲** and **▼** buttons to select a menu (Picture Adjust, Fine Menu 1, Fine Menu 2, Input Signal, RGB/HD Adjust, Display, OSD/Blanking, Config) and press the **►** button.
For image mode selection, see "Picture Mode". (P.22)
3. Use the **▲** and **▼** buttons to select a menu item and press the **►** button.
4. Use the **▲, ▼, ◀** and **►** buttons to make the setting or adjustment of the selected item.
 - The current setting or adjustment level is displayed to the right of each menu item.
5. Press the **MENU** button again to close the menu.

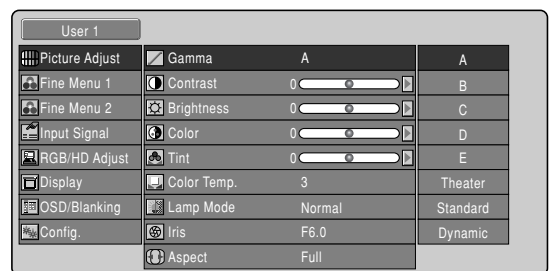

- Adjustment bar

When there is a "▢" right of a menu item, this **►** acts as a button for engaging an adjustment mode. In the adjustment mode, the menu disappears and only an adjustment bar, like that shown below, appears along the bottom of the display. Use the **◀** and **►** buttons to adjust the item to the desired level. Press the **▲** button to return to the menu.

Picture Adjust

Picture quality in each of the picture modes can be adjusted to your liking and those adjustments can be saved in memory.

Item	Adjustments
Gamma	A, B, C, D, E, Theater, Standard, Dynamic
Contrast	-50 ↔ 0 ↔ 50 (Weak) (Default) (Strong)
Brightness	-50 ↔ 0 ↔ 50 (Dark) (Default) (Bright)
Color	-50 ↔ 0 ↔ 50 (Light) (Default) (Deep)
Tint	R50 ↔ 0 ↔ G50 (Purple) (Default) (Green)
Color Temp. (Color Temperature)	1 2 3 4 5 HB (Red) ↔ (Blue)
Lamp Mode	Normal, Economy
Iris	F6.0, F3.0 Sets the lens aperture. F6.0: Use to prioritize contrast. F3.0: Use to prioritize brightness.
Aspect	Full, Normal, Zoom, V-Stretch, Through

Gamma setting

To change the type of Gamma curve, set the Picture Mode (P.22) to User (1 – 9). Select “Gamma” from the displayed menu followed by the desired gamma curve (A, B, C, D, E, Theater, Standard or Dynamic).

Color Temp. (Color Temperature)

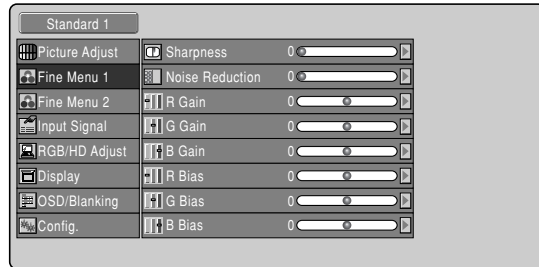

- 1 : Red comes out strong. Color temperature is about 5250 K.
- 2 : Red is mildly strong. Color temperature is about 5800 K.
- 3 : Normal. Color temperature is about 6500 K.
- 4 : Blue is mildly strong. Color temperature is about 7500 K.
- 5 : Blue comes out strong. Color temperature is about 9300 K.
- HB : High Bright : Display brightest image.

NOTES:

- To adjust picture quality, set the index to a mode other than the default. See “Picture Mode”. (P.22)
- The Gamma cannot be set unless User (1 - 9) is set for the Picture Mode (P.22).
- Tint cannot be adjusted for component input, HDMI input or PAL signals. For details, see “Functions by Signal.” (P.20-21)
- The settings made in Picture Adjust are saved in the currently selected Picture Mode index.

Fine Menu 1

By adjusting this Fine Menu, you can make fine picture adjustment.

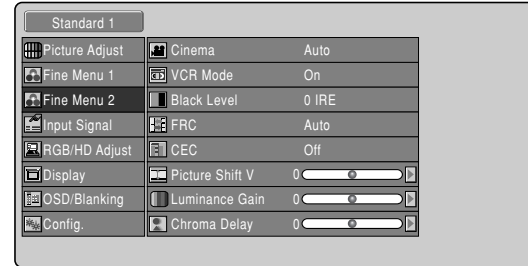

Item	Adjustments
Sharpness	0 ←→ 50
Noise Reduction	0 ←→ 50
R Gain	-50 ←→ 0 ←→ 50
G Gain	-50 ←→ 0 ←→ 50
B Gain	-50 ←→ 0 ←→ 50
R Bias	-50 ←→ 0 ←→ 50
G Bias	-50 ←→ 0 ←→ 50
B Bias	-50 ←→ 0 ←→ 50

- **Sharpness**
Adjust the sharpness.
- **Noise Reduction**
Adjust the noise reduction.
- **R Gain**
This menu allows the users to set the gain for red.
- **G Gain**
This menu allows the users to set the gain for green.
- **B Gain**
This menu allows the users to set the gain for blue.
- **R Bias**
This menu allows the users to set the bias for red.
- **G Bias**
This menu allows the users to set the bias for green.
- **B Bias**
This menu allows the users to set the bias for blue.

Note :

- The settings made in Fine Menu 1 are saved in the currently selected Picture Mode index (Default excluded).

Fine Menu 2

Item	Adjustments
Cinema	Auto, Off
VCR Mode	On, Off
Black level	0 IRE, 7.5 IRE /Expand, Normal (For HDMI input)
FRC	Auto, On
CEC	On, Off
Picture Shift V	-50 ←→ 0 ←→ 50
Luminance Gain	-50 ←→ 0 ←→ 50
Chroma Delay	-5 ←→ 0 ←→ 5

- **Cinema**
Auto : Automatically selects the cinema mode when a video signal is input.
NTSC: 3-2 pull down, PAL: 2-2 pull down
Off : Pull-down processing is not performed.
- **VCR Mode**
On : A projector is forced into the intra-field only deinterlacing mode.
Off : A projector is used with external field memories and operates in the full set of deinterlacing modes, i.e., motion adaptive video deinterlacing and full frame film source deinterlacing using 3:2 pulldown detection (2:2 pulldown for 625/50 sources).
- **Black level**
Select the black level by a video source.
- **FRC (Frame Rate Conversion)**
Auto : Frame Rate Conversion function is basically off. However FRC turns on automatically depending on vertical frequency of input signal.
On : Frame Rate Conversion function is "On". (60Hz fixed)
- **CEC (Chroma Error Correction)**
On : Reduces CUE (Chroma Up-sampling Error) of 1080i signals.
Off : Normally, use this mode.
- **Picture Shift V**
When Aspect on the Picture Adjust menu is set to "Zoom", this setting allows the user to move the projected image vertically in order to see parts on the image not appearing on the screen.
- **Luminance Gain**
This menu allows the users to set the luminance gain.
- **Chroma Delay**
This menu allows the users to set the chrominance delay.

Notes :

- There are some parameters can not adjust according to input signal.
- The settings made in Fine Menu 2 are saved in each currently selected input signal source.

Input Signal

Resolution H	0 ↔ 25 (Default) (Large)
Resolution V	0 ↔ 25 (Default) (Large)
Position H	-50 ↔ 0 ↔ 50 (Left) (Default) (Right)
Position V	-10 ↔ 0 ↔ 10 (Down) (Default) (Up)
Phase	-10 ↔ 0 ↔ 10 (Backward) (Default) (Forward)
Clamp Position	-50 ↔ 0 ↔ 50 (Backward) (Default) (Forward)
Clamp Width	-50 ↔ 0 ↔ 50 (Small) (Default) (Large)

- Mode

Auto: Each item is adjusted automatically.

Memory1-3: If something wrong with Auto Adjust, select Memory, please adjust each item manually.

- Readjust

Select to readjust settings automatically for each item in this menu.

- Resolution H, V

Adjusts the horizontal and vertical resolution of the RGB/HD input signals.

- Position H, V

Adjust the position of the input signal. H adjusts the horizontal position of the input signal. V adjusts the vertical position of the input signal.

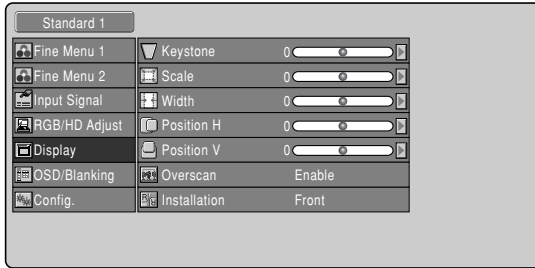

- Phase

Adjust the phase of the DMD dots and the computer signal input from the RGB IN. Adjust the picture to where it looks clearest.

- Clamp Position, Width

Adjusts the clamp position and width used in RGB/HD input.

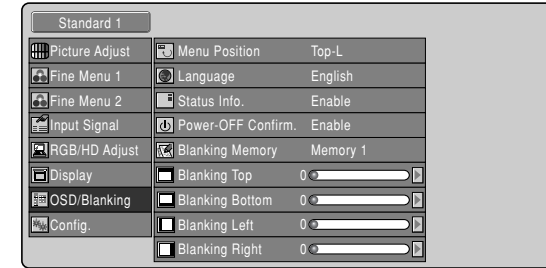

Display

Item	Adjustments
Keystone (Electronic vertical keystone correction)	-25 ↔ 0 ↔ 25 (▽) (■) (▲)
Scale	-100 ↔ 0 (Min) (Max)
Width	-100 ↔ 0 (Min) (Max)
Position H	-50 ↔ 0 ↔ 50 (Left) (Default) (Right)
Position V	-50 ↔ 0 ↔ 50 (Down) (Default) (Up)
Overscan	Enable, Disable
Installation	Front, Rear, F+Ceiling, R+Ceiling

- **Keystone**
Adjust trapezoid image to rectangle image.
- **Scale**
Reduces the image without changing the aspect ratio. The image can be reduced to about 70% the original size.
- **Width**
Reduces the image width without changing the image height. The width can be reduced to about 75% the original size.
- **Position H, V**
Adjust the position of the input signal. H adjusts the horizontal position of the input signal. V adjusts the vertical position of the input signal.
- **Overscan**
Selects whether to show or hide picture borders with NTSC, PAL, SECAM, 480i, 480p, 576i and 576p signals.
Enable: Does not display borders of image signals. (Normally, use this mode.)
Disable: Displays the entire image signal.
- **Installation**
Sets the installation mode of the projector.
Front: Select to set the projector on a tabletop and project from in front of the screen.
Rear: Select to set the projector on a tabletop and project from behind the screen.
F + Ceiling: Select to mount the projector on the ceiling and project from in front of the screen.
R + Ceiling: Select to mount the projector on the ceiling and project from behind the screen.

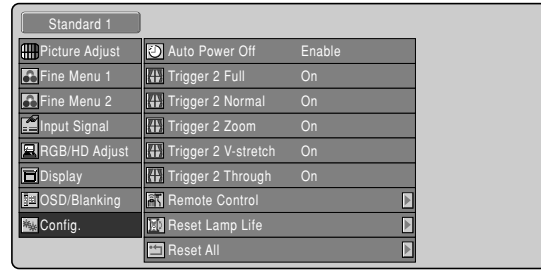

OSD/Blanking

Item	Adjustments
Menu Position	Top-L, Top, Top-R, Center-L, Center, Center-R, Bottom-L, Bottom, Bottom-R
Language	English, Deutsch, Français, Español, Português, Italiano
Status Info.	Enable, Disable
Power-OFF Confirm.	Enable, Disable
Blanking Memory	Off, Memory 1, Memory 2, Memory 3
Blanking Top	0 ↔ 100
Blanking Bottom	0 ↔ 100
Blanking Left	0 ↔ 100
Blanking Right	0 ↔ 100

- **Menu Position**
OSD position is selected from 9 positions.
- **Status Info.**
Enable: Displays the current status of the projector for a set amount of time in the upper right-hand corner of the screen at startup and whenever the Input Source, Picture Mode, Aspect ratio or other setting is changed.
Disable: Does not display Status Info.
- **Power-OFF Confirm.**
Disable: Directly puts the projector on standby without displaying the confirmation message when power is shut off from the \cup button on the remote controller or the \cup/I button on the projector.
Enable: Displays a confirmation message asking whether to shut the power off or continue use when power is shut off from the \cup button on the remote controller or the \cup/I button on the projector. To shut off the power immediately, select "Yes" and press the **ENTER** button. To not shut off the power, select "No" and press the **ENTER** button.
- **Blanking Memory**
Sets the blanking mode with which part of the screen can be hidden in black bands. To use this mode or change the setting, select from Memory 1 to 3.
Off: Turns the blanking mode off. No masking occurs.
Memory 1-3: Memorize the blanking width of the top, bottom, left and right masks set with the below features. Up to three settings can be memorized.
- **Blanking Top, Bottom, Left and Right**
Set the blanking width of the top, bottom, left and right masks, which are then memorized in Memory 1 – 3 of Blanking Memory. Each can be set from 0 (no mask) to a maximum 100.

Configuration

Item	Adjustments
Auto Power Off	Enable, Disable
Trigger 2 Full	On, Off
Trigger 2 Normal	On, Off
Trigger 2 Zoom	On, Off
Trigger 2 V-stretch	On, Off
Trigger 2 Through	On, Off
Remote Control	Wireless, Wired
Reset Lamp Life	Yes, No
Reset All	Yes, No

- Auto Power Off

When the auto power off feature is set to Enable, power to the projector automatically shuts off if no signals are received and no operations are performed for about 10 consecutive minutes. If 9 minutes pass without the projector receiving any signals or being operated in anyway, the below message appears on the screen.

About 1 minute after the message appears on the screen, power to the projector shuts off.

Note:
 After the above message appears on the screen, pressing any button on the projector or remote control other than the **⏻** / **I** button on the projector and the **ON** or **STANDBY** buttons on the remote control resets the auto power off feature.
 The auto power off feature will activate again if, after that, the projector goes without receiving any signals or being operated in anyway for 10 consecutive minutes.

- Tigger 2

Select either 12V output or 0V output by choosing On or Off for each aspect mode. Full, Normal, Zoom, V-stretch and Through.
 This allows you to control such as a powered dual aspect screen with the outputs for the aspect modes.
On: Output DC 12V.
Off: No output.

- Remote Control

Wireless: Set to use the included remote controller.
Wired: Set to control the projector from either Marantz's AV components connected to the REMOTE CONTROL IN/OUT terminals or a PC or other device connected to the RS-232C terminal of the projector. The included remote controller cannot be used in this case.
 When this item is selected, a confirmation message appears asking whether to change the currently selected mode to the other mode or not. To change the mode, select "Yes" and press the **ENTER** button on the projector. To keep the same mode, select "No" and press the **ENTER** button.

Notes:
 - To prevent misoperation, the **ENTER** button of the remote controller does not respond to touch when the Wired/Wireless setting is displayed. Press the **ENTER** button of the projector to enter the setting.
 - To change from Wired to Wireless, set "Wireless" from the menu using the buttons of the projector.

- Reset Lamp Life

If the lamp is replaced before reaching its 2000 hours lamp life, be sure to reset the lamp's life counter. To do this, select "Reset Lamp Life" from the Configuration menu. When the user selects this item, the following message appears:
 Select "Yes", and press the **ENTER** button. Then the lamp life is initialized.

- Reset All

All settings are reset to the factory default settings except the lamp life.
 When the user selects this item, the following message appears:
 Select "Yes", and press the **ENTER** button.

MAINTENANCE

Lamp Life and Replace Lamp

❖ Lamp Life

Display the remaining lamp life by pressing the **INFO.** button on the remote controller.

Information	
Video Input	Component 2 -480p
Picture Mode	User 1
Gamma	A
Aspect	Normal
Lamp Mode	Economy
Iris	F6.0
Lamp Life	921 Hours
Total Time	3653 Hours

Notes:

- The maximum life limit of the lamp is 2,000 hours. Although we care very much about quality, the lamp can rarely break down if running time exceeds 1,000 hours. Therefore we recommend to replace the lamp if Lamp Life gets under 1,000 hours. The lamp cannot be used exceeding the maximum life limit.
- This product is checked under strict quality control when it is shipped out from factory. "Total Hours" in the menu includes the time for this check. So "Total Hours" may not be 0 hours when it is used first time.

- When the lamp life becomes less than 100 hours and the unit is still on, the remaining lamp life is displayed on the screen automatically.

- When the lamp life becomes less than 5 hours, the remaining lamp life is displayed on the screen.

To clear the warning, press the **MENU** button.

- Approximately 2 minutes after the lamp reaches the end of its lamp life, power to the projector shuts OFF and the WARNING indicator lights up a yellow color. If the below message appears on the screen and power shuts OFF soon thereafter, promptly replace the lamp with a new one. (See "Replacing Lamp Unit" P.28)

❖ Initialize the Lamp Life

The lamp has a lamp life of 2000 hours. The projector is designed to shut OFF power if the lamp is used beyond this 2000 hours lamp life. In such case, replace the lamp and reset the lamp life counter as follows.

1. After the message "Lamp Life 0 Hours" appears, power to the projector shuts OFF. Promptly replace the lamp with a new one. (See P.28 "Replacing Lamp Unit")
2. Once the lamp has been replaced, press the **ON** button on the remote control or the **⏻ / I** button on the projector.

The below message appears on the screen for 120 seconds.

3. Select "Yes", using the **◀ / ▶** buttons.
4. Press the **ENTER** button. The lamp life indicator is now initialized.

Replacing Lamp Unit

CAUTION:

- Do not touch the lamp and the lamp unit carelessly. It is extremely hot. Wait at least one hour for the lamp to cool down before handling.
- Do not loosen any screws except for those mentioned below.
- The lamp may break if handled improperly.
- Do not use other than a Marantz replacement lamp unit.

❖ How to replace the Lamp Unit

PREPARATION:

When replacing the lamp, turn off the power for the projector. After the cooling fan stops, disconnect the power cord and wait for one hour until the lamp is cooled down completely, then replace the lamp.

1. Press the **STANDBY** button on the remote controller or the **⏻ / I** button on the projector to turn the projector off.

2. After the cooling fan stops, Unplug the AC power cord.

- Wait at the least one hour for the lamp and lamp unit to cool down.
- Read the caution and warning labels on the unit.

A

For USA

WARNING
THIS COVER IS PROVIDED WITH INTERLOCK TO REDUCE THE RISK OF EXCESSIVE ULTRAVIOLET RADIATION. DO NOT DEFEAT ITS PURPOSE OR ATTEMPT TO SERVICE WITHOUT REMOVING COVER COMPLETELY.

For Europe

CAUTION HOT
UNPLUG THE POWER CORD AND WAIT 60 MINUTES BEFORE CHANGING THE LAMP.

ATTENTION CHAUD
DEBRANCER LE CORD ON D'ALIMENTATION ET ATENDER 60 MINUTES AVANT DE CHANGER LAMPE.

WARNUNG HEISS
ZIEHEN SIE DEN NETZSTECKER AB UND WARTEN SIE 60 MINUTEN, BEVOR SIE DIE GLUHLAMPE WECHSELN.

B

<p>For USA</p> <p>CAUTION : HIGH PRESSURE LAMP MAY EXPLODED IF IMPROPERLY HANDLED. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.</p> <p>ATTENTION : LA LAMPE SOUS HAUTE PRESSION PEUT SI ELLE, N'EST PAS MANIPULEE CORRECTEMENT, CONFIER L'OPERATION A UN PERSONNEL D'ENTRETIEN QUALIFIE.</p>	<p>CAUTION HOT : UNPLUG THE POWER CORD AND WAIT 60 MINUTES BEFORE CHARGING THE LAMP.</p> <p>ATTENTION CHAUD : DEBRANCER LE CORD ON D'ALIMENTATION ET ATENDER 60 MINUTES AVANT DE CHANGER LAMPE.</p>
<p>For Europe</p> <p>CAUTION HIGH PRESSURE LAMP MAY EXPLODED IF IMPROPERLY HANDLED. - Remove the lamp cover screw.

- Remove the lamp cover in the direction of the arrow.

- Open the cover sheet and remove the two screws (slotted head screwdriver required) that lock down the lamp unit. Do not remove any other screws.

- Holding the handle and pull the lamp unit out toward your side.

- Install a new lamp unit in position securely.

- Lock the lamp unit in place with the two screws removed in step 7. Press on the handle until it folds over and close the cover sheet.

- Install the lamp cover back in its original position and fasten with the fastening screw.

- Plug in the video projector and turn on the power and project the image.
 - If the lamp is replaced before reaching its 2000 hours lamp life, see "Reset Lamp Life" (P.27).
 - If the lamp is replaced after reaching its 2000 hours lamp life, see "Initialize the Lamp Life" (P.28).

Cleaning the Lens

If the lens becomes dirty or smudged, clean it with a soft dry cloth only. Use optical lens cleaners that are approved for eyeglasses or cameras. Do not use a dampen cloth, detergent solution, or thinner. It may damage the lens and remain as stains.

Replacement Parts

When replacement parts are required, be sure to inform a Marantz authorized service center. Use only replacement parts specified by Marantz. Unauthorized substitutions may result in fire, electric shock, or other hazards. And, the warranty may not be guaranteed.

Optional Accessories

Lamp Unit : LU-12VPS3

Ceiling Mount kit : MOUNT 20

This kit is specially designed to mount the unit on ceiling.

Extension Pole : EXT-10

This tool is to adjust height with the Ceiling Mount Kit MOUNT 20.

CAUTION:
For ceiling installation, consult with the Marantz Authorized dealer.

TROUBLESHOOTING

Try the following troubleshooting before calling for service.

1. Are the connections made properly ?
2. Are you operating the unit properly, following the instructions ?

If the unit does not operate properly, check the items shown in the following table.

If any trouble cannot be solved by the instructions below, malfunction of the internal circuitry is suspected; immediately unplug the AC power cord and contact Marantz dealer or service center.

Symptom	Possible Cause	Remedy
No power	AC power cord is not connected correctly.	Connect the AC power cord properly.
	Lamp cover is not closed correctly.	Close the cover properly. (P.28)
Image is not displayed.	A signal cable is not connected correctly.	Connect a signal cable properly.
	Selected input is incorrect.	Select the correct input source. (P.16)
	The picture mute is active.	Press the V-MUTE button to release the mute.
Poor color.	Picture is not adjusted properly.	Adjust the picture in the MENU mode.
Picture is too dark.	Lamp life is running out.	Replace the lamp. (P.28)
	Contrast or brightness is not adjusted properly.	Adjust contrast or brightness properly.
Picture is not clear.	Picture is out of focus.	Adjust the focus. (P.11)
	Dew is on the lens.	Run the projector for about two hours.
Picture rolls.	A signal cable is not properly connected.	Connect a signal cable properly.
The Remote Controller does not work.	Batteries are exhausted.	Replace batteries. (P.8)
	The distance to the unit is too far.	Make the distance between the unit and the remote control closer. (P.8)
	IR sensor on unit is obstructed.	Remove any obstacles.
	The "Wired" position in the Menu is selected.	Select the "Wireless" position. (P.27)

Notes:

- If the lamp still does not function after the replacement and initialization of the lamp life, contact a Marantz authorized dealer, or service center.
- This projector uses a microcomputer. External noise can cause malfunctions. In such case, shut power OFF and unplug the power cable from AC power outlet. Then, plug the AC power cable back in, press the  / I button on the projector or the **ON** button on the remote control and check operation.

ERROR MODE

WARNING/LAMP indicator, ON indicator, and STANDBY indicator diagnose error mode of the projector as follows.

Error mode	Indicators			Possible Cause	Recommendation
	WARNING /LAMP	ON	STANDBY		
Lamp cover	ON	OFF	Flashing	The lamp cover is not closed properly.	Close the cover correctly.
Lamp	ON	OFF	OFF	The lamp has failed, or the lamp is completely worn out.	Replace the lamp and reset lamp life.
Temperature	Flashing	OFF	Flashing	Projector internal temperature is higher than the allowed level.	Check if anything is blocking the exhaust vent.
Fan	Flashing	OFF	ON	Trouble has occurred with the fan.	
Other	Flashing	OFF	OFF	Internal program error	Shut power OFF and ON again.

ON SCREEN MESSAGE

Use the list below to check the message displayed on the screen.

Message	Meaning	Remedy
NO SIGNAL	No input signal.	Properly connect the cables.
REPLACE LAMP!	The lamp has reached the end of its life.	Replace the lamp and reset lamp life.
OUT OF RANGE	Improper signal feed to the projector.	Adjust resolution, V(Hz) : refresh rate of the equipment, referring to the Timing Chart.
