Safety Information

⚡ (lightning flash symbol)	The lightning flash with arrow head within an equilateral triangle is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.
⚠ (exclamation point symbol)	The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE. DANGEROUS HIGH VOLTAGES ARE PRESENT INSIDE THE ENCLOSURE. DO NOT OPEN THE CABINET. REFER SERVICING TO QUALIFIED PERSONNEL ONLY.

Class B emissions limits

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

Important Safety Instruction

1. Do not block any ventilation openings. To ensure reliable operation of the projector and to protect from over heating, it is recommended to install the projector in a location that does not block ventilation. As an example, do not place the projector on a crowded coffee table, sofa, bed, etc. Do not put the projector in an enclosure such as a book case or a cabinet that restricts air flow.
2. Do not use the projector near water or moisture. To reduce the risk of fire and/or electric shock, do not expose the projector to rain or moisture.
3. Do not install near heat sources such as radiators, heaters, stoves or any other apparatus such as amplifiers that emits heat.
4. Clean only with dry cloth.
5. Only use attachments/accessories specified by the manufacturer.
6. Do not use the unit if it has been physically damaged or abused. Physical damage/abuse would be (but not limited to):
   - ❒ Unit has been dropped.
   - ❒ Power supply cord or plug has been damaged.
   - ❒ Liquid has been spilled on to the projector.
   - ❒ Projector has been exposed to rain or moisture.
   - ❒ Something has fallen in the projector or something is loose inside.
   Do not attempt to service the unit yourself. Opening or removing covers may expose you to dangerous voltages or other hazards. Please call Optoma before you send the unit for repair.
7. Do not let objects or liquids enter the projector. They may touch dangerous voltage points and short out parts that could result in fire or electric shock.
8. See projector enclosure for safety related markings.
9. The unit should only be repaired by appropriate service personnel.

Precautions

> ⚠️ *Please follow all warnings, precautions and maintenance as recommended in this user's guide.*

■ Warning- Do not look into the projector's lens when the lamp is on. The bright light may hurt your eyes.

■ Warning- To reduce the risk of fire or electric shock, do not expose this projector to rain or moisture.

■ Warning- Please do not open or disassemble the projector as this may cause electric shock.

■ Warning- When replacing the lamp, please allow the unit to cool down. Follow instructions as described on pages 42-43.

■ Warning- This projector will detect the life of the lamp itself. Please be sure to change the lamp when it shows warning messages.

■ Warning- Reset the "Lamp Reset" function from the on-screen display "System | Lamp Settings" menu after replacing the lamp module (refer to page 33).

■ Warning- When switching the projector off, please ensure the cooling cycle has been completed before disconnecting power. Allow 90 seconds for the projector to cool down.

■ Warning- Do not use lens cap when projector is in operation.

■ Warning- When the lamp is approaching the end of its lifetime, the message "Replacement suggested" will show on the screen. Please contact your local reseller or service center to change the lamp as soon as possible.

Note

❖ When the lamp reaches the end of its life, the projector will not turn back on until the lamp module has been replaced. To replace the lamp, follow the procedures listed under "Replacing the Lamp" section on pages 42-43.

Do:

❖ Turn off and unplug the power plug from the AC outlet before cleaning the product.

❖ Use a soft dry cloth with mild detergent to clean the display housing.

❖ Disconnect the power plug from AC outlet if the product is not being used for a long period of time.

Do not:

❖ Block the slots and openings on the unit provided for ventilation.

❖ Use abrasive cleaners, waxes or solvents to clean the unit.

❖ Use under the following conditions:

- In extremely hot, cold or humid environments.

  ▶ Ensure that the ambient room temperature is within 5 - 35°C.

  ▶ Relative Humidity is 5 - 35°C, 80% (Max.), non-condensing.

- In areas susceptible to excessive dust and dirt.
- Near any appliance generating a strong magnetic field.
- In direct sunlight.

Eye Safety Warnings

■ Avoid staring/facing directly into the projector beam at all times. Keep your back to the beam as much as possible.

■ When projector is used in a classroom, adequately supervise students when they are asked to point out something on the screen.

■ In order to minimize the lamp power, use room blinds to reduce ambient light levels.

Package Overview

Unpack and inspect the box contents to ensure all parts listed below are in the box. If something is missing, please contact your nearest customer service center.

Powering On/Off the Projector

Powering On the Projector

1. Remove the lens cap. ❶

2. Securely connect the power cord and signal cable. When connected, the ON/STANDBY LED will turn Amber.

3. Turn on the lamp by pressing "⏻" button either on the top of the projector or on the remote. The ON/STANDBY LED will now turn Green. ❷

   The startup screen will display in approximately 10 seconds. The first time you use the projector, you can select your preferred language from quick menu after the startup screen displays.

4. Turn on and connect the source that you want to display on the screen (computer, notebook, video player, etc). The projector will detect the source automatically. If not, push menu button and go to "SETUP".
   Make sure that the "Source Lock" has been set to "Off".

❖ If you connect multiple sources at the same time, press the "SOURCE" button on the control panel or direct source keys on the remote control to switch between inputs.

English

② Power

POWER

① Lens Cap
Note

❖ Turn on the projector first and then select the signal sources.

Installation

Powering Off the Projector

1. Press the "⏻" button on the remote control or "⏻" button on the control panel of the projector two times with one second interval in between to turn off the projector. First push of button will display the following message on the screen.

   Press the "⏻" button (or the "⏻" button) again to confirm the shut down. If the button is not pressed, the message will disappear after 15 seconds.

2. The cooling fans continue to operate for about 60 seconds for cooling cycle and the ON/STANDBY LED will Flash Green. When the ON/STANDBY LED lights solid Amber, the projector has entered standby mode.
   If you wish to turn the projector back on, you must wait until the projector has completed the cooling cycle and has entered standby mode. Once in standby mode, simply press "⏻" button to restart the projector.

3. Disconnect the power cord from the electrical outlet and the projector.

4. Do not turn on the projector immediately following a power off procedure.

❖ Contact the nearest service center if the projector displays these symptoms. See pages 47-48 for more information.

Warning Indicator

❖ When the "LAMP" indicator lights Red ("ON/STANDBY" indicator flashes Amber), the projector will automatically shut down. Please contact your nearest service center for assistance.

❖ When the "TEMP" indicator lights Red ("ON/STANDBY" indicator flashes Amber), it indicates the projector has overheated. The projector will shut down automatically. Under normal conditions, the projector can be switched on again after it has cooled down.

❖ When the "TEMP" indicator flashes Red ("ON/STANDBY" indicator flashes Amber), it indicates the fan has failed.

Adjusting the Projected Image

Adjusting the Projector's Height

The projector is equipped with elevator feet for adjusting the image height.

1. Locate the adjustable foot you wish to modify on the underside of the projector.

2. Rotate the adjustable ring counter clockwise to raise the projector or clockwise to lower it. Repeat with the remaining feet as needed.

English

Tilt-Adjustment Feet

Tilt-Adjustment Ring

Installation
Adjusting the Projector's Zoom / Focus

You may turn the zoom ring to zoom in or out. To focus the image, rotate the focus ring until the image is clear.
The projector will focus at distances from 4.89 to 32.68 feet (1.49 to 9.96 meters).

Control Panel & Remote Control

There are two ways for you to control the functions: Control Panel and Remote Control.

Control Panel

Using the Control Panel

⏻ Power	Refer to the "Power On/Off the Projector" section on pages 13-14.
RE-SYNC	Automatically synchronize the projector to the input source.
↵ Enter	Confirm your item selection.
SOURCE	Press "SOURCE" to select an input signal.
▤ Menu	Press "Menu" to launch the on-screen display (OSD) menu. To exit OSD, Press "Menu" again.
Four Directional Select Keys	Use ▲ ▼ ◄► to select items or make adjustments to your selection.
☀ Lamp LED	Indicate the projector's lamp status.
🌡 Temp LED	Indicate the projector's temperature status.
⏻ On/Standby LED	Indicate the projector's status.

User Controls

Remote Control

Using the Remote Control		
Power On		Refer to the "Power On" section on page 13.
Power Off		Refer to the "Power On/Off the Projector" section on page 14.
Lamp Mode		Increase the brightness of the image. (refer to page 33)
Mode		Select the display mode from Cinema, Bright, Photo, Reference and User.
4:3	4:3	Scale the image at a 4:3 aspect ratio.
16:9	16:9	Scale the image at a 16:9 aspect ratio.
LBX	LBX	Enable the viewing of the letterboxed nonanamorphically enhanced movie at full screen width. Part of the original image will be lost if the image aspect ratio is less than 2.35:1.
Native	N	The input source will be displayed without scaling.
Brightness		Adjust the brightness of the image.
Contrast		Control the degree of difference between the lightest and darkest parts of the picture.
EdgeMask		Mask off a few pixels on each edge of the image to be displayed. Use this function to adjust if image source happens to have noise near any edge of the display image.
Source Lock		Select auto detection all connector ports or lock current connector port.
Overscan		Mask off a few pixels on each edge of the image to be displayed. Use the function to adjust if image source happens to have noise near any edge of the display image.

Remote Control

Using the Remote Control		
Enter	↵	Confirm your item selection.
Source	◄	Press "Source" to select an input signal.
Re-sync	►	Automatically synchronizes the projector to the input source.
Menu	▤	Display or exit the on-screen display menus for projector.
HDMI 1		Press "HDMI 1" to choose source from HDMI 1 connector.
HDMI 2		Press "HDMI 2" to choose source from HDMI 2 connector.
D-Sub		Press "D-Sub" to choose source from VGA/SCART/YPbPr connector.
YPbPr	⊙⊙⊙	Press "YPbPr" to choose Component video source.
Video	⊙	Press "Video" to choose Composite video source.
Four Directional Select Keys		Use ▲ ▼ ◄► to select items or make adjustments to your selection.

On-screen Display Menus

The Projector has multilingual On-screen Display menus that allow you to make image adjustments and change a variety of settings. The projector will automatically detect the source.

How to operate

1. To open the OSD menu, press "Menu" on the Remote Control or Projector Keypad.

2. When OSD is displayed, use ◀▶ keys to select any item in the main menu. While making a selection on a particular page, press ▼ or "Enter" key to enter sub menu.

3. Use ▲ ▼ keys to select the desired item and adjust the settings using ◀▶ key.

4. Select the next item to be adjusted in the sub menu and adjust as described above.

5. Press "Enter" to confirm, and the screen will return to the main menu.

6. To exit, press "Menu" again. The OSD menu will close and the projector will automatically save the new settings.

SuperWide

**Note**

❖ "SuperWide" is "Off" as default.

SuperWide is a feature that uses a special 2.0:1 aspect ratio screen enabling both 16:9 and 2.35:1 aspect ratio movies to be shown without black bars at the top and bottom of the screen

▸ Off: Your desired aspect ratio can be selected - 4:3, 16:9, LBX and Native.

▸ On: Only formats 4:3 and 16:9 can be selected.

▸ Auto: To solve the differences of the film formats, the option can keep the format in the same ratio.

How to use "SuperWide"

1. Obtain a 2.0:1 aspect ratio screen
2. Switch SuperWide ON
3. Align the projector image correctly on the screen
4. Enjoy movies without black bars

SYSTEM
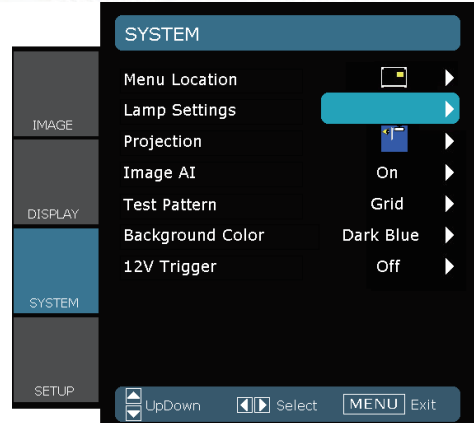

Menu Location

Choose the menu location on the display screen.

Projection

▶ Front-Projection

This is the default selection. The image is projected straight on the screen.

▶ Rear-Desktop

When selected, the image will appear reversed.

▶ Front-Ceiling

When selected, the image will turn upside down.

▶ Rear-Ceiling

When selected, the image will appear reversed in upside down position.

Note

❖ Rear-Desktop and Rear-Ceiling are to be used with a translucent screen.

▶ Hue: Adjust the color balance of red and green. Press the ◀ to increase the amount of green in the image. Press the ▶ to increase the amount of red in the image.

▶ IRE: Adjust measurement of composite video signals.

Appendices

Troubleshooting

If you experience a problem with your projector, please refer to the following information. If a problem persists, please contact your local reseller or service center.

Image Problems

? No image appears on-screen

▸ Ensure all the cables and power connections are correctly and securely connected as described in the "Installation" section.

▸ Ensure all the pins of connectors are not bent or broken.

▸ Check if the projection lamp has been securely installed. Please refer to the "Replacing the lamp" section.

▸ Make sure you have removed the lens cap and the projector is switched on.

? Image is out of focus

▸ Make sure the lens cap is removed.

▸ Adjust the Focus Ring on the projector lens.

▸ Make sure the projection screen is between the required distance 4.89 to 32.68 feet (1.49 to 9.96 meters) from the projector. See page 16.

? The image is stretched when displaying 16:9 DVD title

▸ When you play anamorphic DVD or 16:9 DVD, the projector will show the best image in 16:9 format on projector side.

▸ If you play the LBX format DVD title, please change the format as LBX in projector OSD.

▸ If you play 4:3 format DVD titles, please change the format to 4:3 in the projector OSD.

▸ If the image is still stretched, you will also need to adjust the aspect ratio by referring to the following:

▸ Please setup the display format as 16:9 (wide) aspect ratio type on your DVD player.

English

? Image is too small or too large

▸ Adjust the Zoom Ring on the top of the projector.
▸ Move the projector closer to or further from the screen.
▸ Press "Menu" button on the remote control or projector panel, go to "Display → Format" and try the different settings.

? Image has slanted sides

▸ If possible, reposition the projector so that it is horizontally centered on the screen and below the bottom of the screen.

? Image is reversed

▸ Select "SYSTEM → Projection" from the OSD and adjust the projection direction.

Other Problems

? The projector stops responding to all controls

▸ If possible, turn off the projector, then unplug the power cord and wait at least 60 seconds before reconnecting power.

? Lamp burns out or makes a popping sound

▸ When the lamp reaches its end of life, it will burn out and may make a loud popping sound. If this happens, the projector will not turn on until the lamp module has been replaced. To replace the lamp, follow the procedures in the "Replacing the Lamp" section on pages 42-43.

? On Screen Messages

▶ Fan failed:
The projector will switch off automatically.
▶ Over temperature:
The projector will switch off automatically.

▶ Replacing the lamp:
Lamp is approaching the end of it's rated life.
Replcement suggested.

Remote Control Problems

? If the remote control does not work

▶ Check the operating angle of the remote control is within ±15° both horizontally and vertically of one of the IR receivers on the projector.

▶ Make sure there are not any obstructions between the remote control and the projector. Move to within 8 m of the projector.

▶ Make sure the batteries are inserted correctly.

▶ Replace batteries if they are exhausted.

Replacing the lamp

The projector automatically detects the lamp life. When the lamp life is nearing the end of use, you will receive a warning message.
When you see this message, please contact your local reseller or service center to change the lamp as soon as possible. Make sure the projector has been cooled down for at least 30 minutes before changing the lamp.

⚠ ⚠ ⚠ CAUTION!
HIGH PRESSURE LAMP MAY EXPLODE IF IMPROPERLY HANDED. REFER TO LAMP REPLACEMENT INSTRUCTIONS.
ATTENTION:
Les lampes à haute pression peuveñt exploser si elles sont mal utilisées.
Confier l'entretien à une personne qualifiée.

⚠ Warning: If ceiling mounted, please use caution when opening the lamp access panel. It is recommended to wear safety glasses if changing the bulb when ceiling mounted. "Caution must be used to prevent any loose parts from falling out of projector."

⚠ Warning: Lamp compartment may be hot! Allow it to cool down before changing the lamp!

⚠ Warning: To reduce the risk of personal injury, do not drop the lamp module or touch the lamp bulb. The bulb may shatter and cause injury if it is dropped.

English

Note

❖ The screws on the lamp cover and the lamp cannot be removed.

❖ The projector cannot be turned on if the lamp cover has not been placed back on the projector.

❖ Do not touch the glass area of the lamp. Hand oil can cause the lamp to shatter. Use a dry cloth to clean the lamp module if it was accidentally touched.
Lamp Replacement Procedure:

1. Switch off the power to the projector by pressing the "⏻" button.
2. Allow the projector to cool down for at least 30 minutes.
3. Disconnect the power cord.
4. Unscrew the two screws on the cover. 1
5. Lift up and remove the cover. 2
6. Unscrew the two screws on the lamp module. 3
7. Lift up the lamp handle and remove the lamp module slowly and carefully. 4

To replace the lamp module, reverse the previous steps.

8. Turn on the projector and use "Lamp Reset" after the lamp module is replaced.

Lamp Reset: (i) Press "Menu" → (ii) Select "SYSTEM" → (iii) Select "Lamp Settings" → (iv) Select "Lamp Reset" → (v) Select "Yes".

Appendices

Ceiling Mount Installation

1. To prevent damage to your projector, please use the Optoma ceiling mount.
2. If you wish to use a third party ceiling mount kit, please ensure the screws used to attach a mount to the projector meet the following specifications:

   ‣ Screw type: M3*3
   ‣ Maximum screw length: 10mm
   ‣ Minimum screw length: 7.5mm

Note

❖ Please note that damage resulting from incorrect installation will invalidate the warranty.

Note

⚠ Warning:
1. If you buy a ceiling mount from another company, please be sure to use the correct screw size. Screw size will vary depending on the thickness of the mounting plate.
2. Be sure to keep at least 10 cm gap between the ceiling and the bottom of the projector.
3. Avoid installing the projector near a heat source.

Regulation & Safety notices

This appendix lists the general notices of your projector.

FCC notice

This device has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the device and receiver.
- Connect the device into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for help.

Notice: Shielded cables

All connections to other computing devices must be made using shielded cables to maintain compliance with FCC regulations.

Caution

Changes or modifications not expressly approved by the manufacturer could void the user's authority, which is granted by the Federal Communications Commission, to operate this projector.

Operation conditions

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference and
2. This device must accept any interference received, including interference that may cause undesired operation.

Notice: Canadian users

This Class B digital apparatus complies with Canadian ICES-003.

Remarque à l'intention des utilisateurs canadiens

Cet appareil numerique de la classe B est conforme a la norme NMB-003 du Canada.

Declaration of Conformity for EU countries

• EMC Directive 2004/108/EC (including amendments)
• Low Voltage Directive 2006/95/EC
• R & TTE Directive 1999/5/EC (if product has RF function)

Disposal instructions

Do not throw this electronic device into the trash when discarding. To minimize pollution and ensure utmost protection of the global environment, please recycle it.
